Chinook

The Cereal Dramatic Club

Will Present the Three Act Comedy

"Too Much Married"
At School Hall, Chinook
Tuesday, December 13
Starting at 8 p.m.

This comedy is full of laughs from the rise of the curtain on Act One to the drop after Act Three. A well-known Chinook professional man who saw it at Cereals was more than pleased with the entertainment. If you feel like laughing be sure and be there next Tuesday, Dec. 13, at 8 p.m.

After the Show the New and Peppy

CEREAL ORCHESTRA
will put on a

DANCE

LOCAL ITEMS

Otto Fensky was a business visitor in Calgary over the week end.

Mr. A. W. Gollmer, of Cereals, was a business visitor in Chinook Tuesday.

Get your Xmas Cards, Tags, Seals and Ribbons from E. E. Jacques, Druggist.

Mr. Bray, representative of the Soldier Settlement Board, visited in the Scotfield district last week.

Mrs. R. Peyton and her daughter Julia returned from Calgary Friday, after spending a week in the city.

Mr. and Mrs. Sloan, of Heathdale left last Saturday for Ashmount, Alberta, where they will make their home.

Mrs. O. Nelson left Sunday morning for Calgary, where she will spend two weeks with her mother, Mrs. Fowler.

Mr. Wm. Young loaded a car of settler's effects and left Tuesday for Killam, where he will operate the farm of his brother John.

There has been a scarcity of coal the past week in the Naco district and some towns in places near there were hauling coal from Chinook.

Mr. and Mrs. Alex Campbell, of High River, arrived in Chinook Tuesday morning and will visit for a few weeks with the latter's mother, Mrs. Barton.

Mr. Percy Dobson, of Calgary, spent Wednesday at the home of his mother in Chinook, leaving Thursday morning for Montreal and other points east, on a business trip.

Mr. and Mrs. Walter Anderson left Saturday morning for Santiago, California, where they will spend the winter at the home of Mrs. Anderson's parents, Mr. and Mrs. Jos. Hess.

A concert will be given by the children of the Chinook Consolidated School on Thursday, Dec. 22nd, at the school. After the concert there will be a Christmas tree for the children.

The young child of Mr. and Mrs. Geo. Connell, who reside north of Chinook, was rushed to Cereals hospital in a freight caboose Tuesday afternoon, suffering from a ruptured appendix.

The Ladies' Card Club met Tuesday evening at the home of Mrs. Harry Smith, four tables of bridge being played, Mrs. Rennie held the highest score of the evening, winning a beautiful cake plate.

Mr. E. A. Proctor returned to Kelsey Friday. Mr. Proctor had been at his farm here expecting to get his threshing done, but on account of the stormy weather, all threshing operations had to be discontinued and will no doubt be left until spring before this work is finished.

A fire started in the chimney at the home of R. Vanhook on Friday night, which threatened to become serious. As the night was severely cold, Mr. Vanhook had built up a good fire in the stove. Mrs. Vanhook, who was preparing to retire for the night, noticed the fire and called her husband's attention to it. With the assistance of neighbors the fire in the chimney was put out, but the fire had gotten between the walls and soon started again. It was extinguished before much damage was done.

Personal Greeting Cards may be procured at the Advance Office

Miss Doris Vice, of Cereals, is at present staying with Mrs. Dawson.

Miss Edna Anderson, of Heathdale, is assisting Mrs. Vanhook with her house work.

Miss Agnes Fayter, of Rose-town, Sask., is visiting with her mother here for a short time.

The Chinook Ladies Aid are putting on an Apron and Handkerchief Sale in the Station Waiting Room on Saturday, Dec. 10, from 3 to 6 p.m. Tea will also be served.

Mr. and Mrs. N. F. Marcy returned home Tuesday morning after having spent a week in Winnipeg as delegates to the annual convention of the United Grain Growers.

Geo. Hodson, of Moose Jaw, Sask., superintendent of the Imperial Lumber Co., was making his annual check-up at the yard in Chinook this week. He left for Moose Jaw Wednesday, taking along with him Mr. Jos. Freeman, who has been assistant at the yard here for some time.

NO BANK THIS WINTER

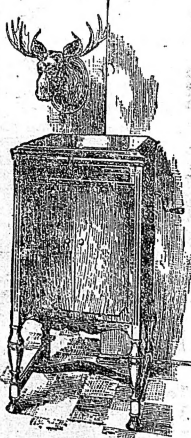

Two weeks ago a petition was circulated around Chinook regarding the reopening of a branch of the Royal Bank of Canada here. On Friday last Mr. J. L. Carter received the following letter from the bank manager at Cereals in reference to that petition:

SUB BRANCH, CHINOOK, ALTA.
"With reference to your letter of the 22nd ult., in the above connection, I have been instructed to advise you that my Head Office greatly appreciates the interest the petitioners have taken in the matter of operating a sub-branch at Chinook, but at the present time we are unable to establish a sub-branch service there.

I have also been instructed to advise you, when conveying the above information to you, that they propose to consider the entire question again in the early spring, and if the prospect is at all favorable they will very likely extend our facilities to Chinook for at least a part time service.

Yours very truly,
E. G. Parsons, Manager.

Reward Wheat Shows Highest Average Protein Content of Any Western Prairie Grown Variety

Reward wheat shows the highest average protein content of any wheat grown on the Canadian prairies, according to chemical tests completed at Ottawa.

Reward wheat, centre of controversy at the Royal Winter Fair, stands higher than Kuby, Ruby, Marquis, Garnet and Kitchener, according to these tests.

Samples of Reward wheat from experimental farms and stations in Manitoba, Saskatchewan and Alberta have shown an average protein content of 17.52 per cent, regarded as remarkably high for flour-making qualities. Other wheat varieties, tested on a similar scale, contained protein of from 14.51 per cent to 17.23 per cent.

At the instance of the Dominion cerealists an analysis of a series of wheats grown on 18 experimental farms and stations from Prince Edward Island to British Columbia has been made during the past year and a copy of the Dominion cerealists' report has just been received in Regina.

The series consisted of 165 samples, comprising 45 varieties, all taken from the crop of the same year. Chief objects of this study were to ascertain varietal differences, chiefly in protein content, under the same environmental conditions, and also to find out the influence of different environmental conditions on the character of the grain of the same variety.

Marquis and Garnet varieties, the most commonly sown in the West at present, came in for much attention, Reward being still regarded by Ottawa authorities as an uncompleted experiment. The results of these tests are not held conclusive by the Dominion cerealists, who reports that they should be supplemented by those of a future series before their detailed consideration with a view to definite conclusion, would be justified.

Reward wheat showed a great consistency in protein content in samples taken in Manitoba and Saskatchewan. It ranked highest of the 29 samples taken at Brandon, first among 33 samples from Scott and first of 14 samples from Indian Head. It was a close second at Beaveridge and second too, at Morden. At Rossmore, Swift Current and Lethbridge, it ranked fourth.

A report from the Minnesota State Experiment Station at Mille Lacs, Minn., on Marquis and Garnet wheats, grown at Scott, Sask., shows these grains to have rich flour-making qualities. "These samples, were considered almost alike and were both classed as 'unquestionably strong' with excellent bread-making properties. The analysis of the wheat showed that both contain less than 15 per cent protein. Reward in early tests, has been shown to have much more than that."

Storms Caused By Lack Of Forest

Trees Act As Lightning Rods Says French Expert Of Wireless

Trees are lightning rods and the increasingly bad weather is due to the destruction of forests, says Edouard Dransley, France's grand old man of wireless.

"If there are no longer seasons," he says, "deforestation is the principal, if indeed, alas, not the sole cause."

"Trees on the heights with their pointed tips toward heaven and their roots deep in the damp ground, are nothing less than so many lightning rods, constantly discharging into the earth the atmospheric electricity and thereby preventing its accumulation. In the clouds, an accumulation that would cause terrible storms. In wooded districts there was calm, but now that the woods are being cut down there are constant rain storms."

Grain Grown In Northern D.C.

The Lard River District in the extreme north of British Columbia can produce excellent crops of grain and vegetables, it is stated by the Department of Agriculture, following experiments carried out in conjunction with the Canadian Mounted Police. Specimens of grain have been received at Victoria.

Could Not Beat Birds

Drig-Gen. C. R. Brooke, of London, Conservative member of Parliament and sportsman, recently vouched that he could beat carrier pigeons in a cross country race. He travelled 105 miles and turned home 100 birds, then sped home by motor car and fast train. The whole flock had arrived an hour before the speeding general.

London will have this year 14 new moving picture theatres of seating capacity of 2,500 or more, the total cost being approximately \$15,000,000.

W. N. U. 1710

Age Of Steers To Feed

Two Year Old Steers Make the Greatest Gains

In selecting steers for feeding work, the age of the animals is an important consideration. All things considered the average feeder would be well advised to feed two-year-olds. In the opinion of the authors of an Experimental Farms bulletin on the "Winter Feeding of Beef Cattle in Ontario." The bulletin gives an account of experiments in feeding steers of different ages. Over a six years period the two-year-olds made the greatest gains, but the yearlings were a close second and the three-year-olds were not far behind. The younger steers had the advantage in the cost per pound gain, as the cost increases with age. The lower feeding cost of the younger steer is due to the fact that he is growing and putting on fat at the same time while the three-year-old makes his gains by putting on fat alone. The younger steer, however, needs a somewhat more nutritious ration than the older one, the latter making the best use of coarse roughage.

Wild Flowers Of The Rockies

Abundant Flora Found Amid the Higher Altitudes

One of the great charms in the national parks in the Canadian Rockies is the variety and beauty of the wild flowers. At first thought one would perhaps not expect to find an abundant and interesting flora amid the higher altitudes, but, strange as it may seem, the wildflower gardens which bloom above the clouds in the upper reaches are among the most beautiful in the world. Over five hundred varieties have been identified by botanists, and their exquisite color, fragrance, and delicate loveliness add the last touch to the charm of that wonderful region.

A Smart Tunic Blouse and Skirt

The tunic blouse is quite new and smart this season, and the one pictured here, having a square neck and long sleeves, is exceedingly effective. It is made of a material with a pattern of buttons or buckles, forming an attractive trimming, and a belt fastens in front. No. 1682 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 2 1/2 yards 39-inch, or 1 1/2 yards 54-inch material, and 4 yards 1-inch ribbon. Price 20 cents the pattern.

The skirt has six plaits at the left side, and is joined to a dart-fitted bodice top having straps over the shoulders. No. 1322 is in sizes 34, 36, 38, 40 and 42 inches bust. Any size requires 1 1/2 yards 39 or 54-inch material, and 1 yard 36-inch lining for the bodice top. Price 20 cents the pattern.

Our Fashion Book, illustrating the latest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Danish Scientist Makes Interesting Discovery

Found In Brussels Head Of Famous Statue Owned By Denmark

An interesting piece of archaeological surgery, which gives hope that the Venus de Milo may some time be supplied with arms and a Winged Victory with a head, has been accomplished here through the kindness of observation of the Danish scientist, M. Blinckenberg.

Mr. Blinckenberg, who made a long study of ancient Greek sculpture, particularly various statues of Aphrodite, visited the Museum Cluikstonian at Brussels recently. In studying the famous torso of the Venus of Cnidus, one of the most precious relics in the museum he noticed that the head seemed to have been broken off in precisely the same manner as the head of a Venus he had studied in Copenhagen.

Returning to the Danish capital he had a plaster cast made of the head and shipped to Brussels, where it was found that the head fitted exactly in the decapitated torso. Arrangements have been concluded for an exchange of objects with the Copenhagen museum so that the Venus of Cnidus, with the head restored, may become one of the most beautiful statues of Venus extant.

Roughage Ground Or Fed Whole

Experiments Would Indicate That Grinding Roughage Does Not Improve It

The results of an investigation into the advantages and economy of grinding roughages for dairy cows, conducted at the Central Experimental Farm, show that the grinding of the rough feed did not add materially, if at all, to its feeding value. The details of the investigation are given in the latest report of the Dominion Animal Husbandry. Among other things it was demonstrated that cut corn fodder is not of as high value for milk production as cornilage. When corn fodder and mixed hay were both cut and ground and fed in comparison with silage and the same mixed hay, not cut or ground, the latter ration proved to be slightly the more efficient for milk production. These results indicate that grinding roughage does not improve it. On the other hand, the extra labor of cutting and grinding adds materially to the cost. It can safely be said, therefore, that under normal conditions, it would not be economical to grind rough feed, at least for dairy cows, particularly since there is no class of stock better adapted to grinding their own feed.

Japanese Children Send Gifts

As a Christmas gift to the children of the United States from 5,000,000 Japanese girls, fifteen dolls have been made by the most expert craftsmen in Japan. They will be a reciprocal remembrance for the 13,000 "friendship dolls" sent by children in the United States to the Japanese doll festival last March. Extensive warehouses of alken kimonos and obis, with trunks and appropriate furniture have been supplied for each doll.

May Abolish Cropping Dogs' Ears

Cropping dogs' ears is a practice which will be discussed and its abolition sought at the December meeting of the American Kennel Club at New York. A rule to be submitted to the Kennel Club for adoption proposes that dogs of several breeds that are born after July 1, 1925, must wear their ears bestowed upon them by Mother Nature or be barred from the show ring.

The more a man gets the more he wants—unless a police judge is dealing it out.

A hypocrite is a man who pretends to be what he can't—with the accent on the can't.

Winners of Boys' and Girls' Swine Club Competitions

Winners of the Manitoba and Saskatchewan championships of the Boys' and Girls' Swine Club competitions among the lines of the Canadian National Railways, who attended the Royal Exhibition at Toronto as the guests of the Railway. From left to right: J. D. Guld, assistant to the agricultural agent, Canadian National Railways, Winnipeg, who accompanied;

Weed Seeds In Seed Grain

Great Care Should Be Exercised In Selection and Cleaning

Every farmer is aware of the trouble and loss caused by weeds yet many farmers use poorly cleaned seed grain which is responsible for the introduction of new weeds and the increase of those already in the land. The Dominion Seed Branch has conducted an inquiry into this source of the spread of weeds and the results are summed up in a bulletin on "Weeds and Seed Grains." The inquiry elicited the fact that about 75 per cent of Canadian farmers grow their own seed grain. Most of the grain purchased for seed is secured from neighboring farmers, but considerable quantities are obtained from grain dealers and seed merchants.

Analysis of samples collected shows that most of the grain sold for seed contains large numbers of different kinds of weed seeds. Weed seeds are also prevalent in home grown seed. It is therefore obvious that great care should be exercised in selection and cleaning. Some weed seeds are difficult to separate but most of them may be removed by a properly equipped and well operated fanning mill. When the fanning mill is poorly equipped or badly operated little good is done by its use. The inquiry even showed that a considerable percentage of grain is sown direct from the threshing, with no cleaning whatever.

The bulletin, which contains descriptions and methods of control of a large number of weeds, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Feeding Swine In Sheds

Expensive and Warm Housing Not Necessary In the Winter Time

Yorkshire and Berkshire pigs were used in an investigation carried on at the Central Experimental Farm with the primary object of determining the advisability of feeding pigs in single-boarded sheds, each pen provided with a warm enclosed sleeping berth, and with outside runs accessible at all times, as contrasted with feeding in a more expensive type of building. The results of the investigation show that the single-boarded shed, with warm pigsties and runs, is not a necessity in winter swine-feeding. The pigs fed under the colder conditions, as would be expected, consumed slightly more feed than those in the warmer building, but they were healthier. The Berkshires appeared to make rather more economical gains than the Yorkshires under the single-feeding method, as the former breed requires more exercise under fairly heavy winter feeding conditions. Another observation made during the experiment was that seal-sold buttermilk does not prove economical as a substitute for skim-milk or ordinary buttermilk.

Giving a Forest Fire Warning

Practical System Of Wireless Telephones Used By Air Force

Royal Canadian Air Force aircraft engaged in forest patrol work for the Forest Service, Department of the Interior, are equipped with wireless telephones. A practical system of wireless telephones has been developed and reliable voice communication can be maintained over distances of 200 miles from aircraft in flight to the base. The Air Station is linked with the ground telephone system of the Forest Service so that warning of a detected fire can be almost instantly transmitted from the aircraft to the ranger station nearest the outbreak.

Compliments are the red fires that light up life's dingy scenery.

Makes Plea For Eskimo, Who Are Needed To Develop The Great Northern Areas of Canada

Storage Of Seed Potatoes

Must Be Kept Cool and Dry, and Have Proper Ventilation

Good seed potatoes are essential for the production of good crops, and it has been clearly proven that the seed potatoes certified under the rules and regulations of the Dominion Department of Agriculture can be depended upon to give high yields of excellent quality. But securing certified seed is not enough. According to a new pamphlet by the Publications Branch, Department of Agriculture, Ottawa, the care of the potatoes in storage before seedling time is highly important. Potatoes, no matter how perfect, cannot stand rough handling, high temperatures, or wet conditions.

After having gone to the trouble of producing a crop of certified seed potatoes or of obtaining them from a dealer, it would be foolish to allow them to deteriorate on account of improper storage. The proper temperature at which potatoes should be stored is 37 degrees F. It is absolutely essential that the potatoes be kept as dry as possible, and the best means to obtain this result would be to store them in crates, providing means for the free circulation of air among the crates throughout the entire storage period. Bag storage is a safe method only if the potatoes can be kept dry. If bin storage is resorted to, care should be taken to avoid piling the tubers against the wall or directly on the floor, as this practice does not permit of sufficient ventilation, especially when the quantity is large. A false wall of slats, close enough together to retain the potatoes and about 6 inches from the main wall should be constructed. A temporary floor should be laid down about 6 inches above the permanent floor, with circulation space between the boards to allow free circulation of air under and around the pile. In the case of large piles, ventilators made of wood on slats should be placed at regular intervals, both vertically and horizontally, throughout the pile.

Reasons Are Numerous

Why City Men Move To Farms and Farmers To City

An attempt by the Department of Agriculture to find out why the farm boy longs for the city and the city dweller longs for the farm has resulted in the disclosures of a wide variety of reasons.

Opportunity for making a better living on the farm than in the city was found to be the principal reason for movement from city to farm which, the department survey said, was composed largely of former farmers who had been disillusioned by city life.

The high cost of living in cities drove some persons to the farm, and others were induced to take up farming for the satisfaction of an independent life.

Some farmers move to town because they cannot make farming pay, or are drawn to the city by the lure of a larger income. Others move because of better social facilities for their children; others still because of being physically unable to continue farming and a small number because of financial inability to retire.

A steady wedding out of older people on the farm who are replaced in part at least by men and women in earlier life, was found by the survey. Although the total farm population is reduced in numbers the report stated, the result is the development of a more vigorous and efficient agriculture. A detriment, however, is that those who retire take with them to the city a volume of financial wealth and experience, the loss of which retards rural institutional improvements.

The former kaiser says he has always had a liking for Great Britain. Also for France, doubtless. He tried so hard to go to Paris a few years ago.

Lawyer: I wish to inform you that your wife is seeking a divorce. Husband: Fine, tell her to get one for me, too.

If all that is being said is true in regard to aviation, we shall be very much up in the air next year.

In Austria all women in government employ must be addressed as "Frau" regardless of age and whether married or unmarried.

A good neighbor is one who lacks interest in affairs that are none of his business.

Action by the Dominion Government to preserve Canada's dwindling Eskimo population was urged by Capt. H. T. Munn, F.R.G.S., pioneer explorer of the Northwest, in an address before the Canadian Club at the Windsor Hotel, Montreal.

Canada's Eskimo population is now 5,500, as compared with between 10,000 and 15,000 fifty years ago, said Capt. Munn. To prevent further dwindling in numbers he recommended that Canada adopt successful measures used by the United States in Alaska and by Denmark in Greenland.

That herds of reindeer should be imported into the Canadian Northwest the territory east of the Mackenzie River to the Hudson's Bay and Davis Straits, was the first recommendation of the speaker. He cited the example of Alaska. He said that 25 years ago 1,250 reindeer had been imported into Alaska, and from that number had sprung 675,000, the number of reindeer now in Alaska. With the growth of the reindeer stock had come prosperity to the Eskimos of Alaska, who now numbered 12,000.

Secondly, Capt. Munn would have Canada follow the example of Denmark in Greenland and prevent exploitation by white men in the far North. Denmark could the Eskimos in Greenland in 1550 to be "dirty, debauched and dwindling," declared Capt. Munn. The Danes ousted white traders from the territory, and formed a government trading company on behalf of the Eskimos which would accomplish the same purpose without exploiting the natives. The 1920 census showed the Eskimos in Greenland had increased to over 15,000, and were "cleanly, contented and prosperous," said Capt. Munn, in advocating this policy for Canada.

It is to Canada's advantage to preserve its Eskimo population, in the opinion of the speaker. He called it bad morals and bad business to neglect them. Great areas in the northwest awaited development, and this could not be done to the advantage of Canada without the aid of the Eskimo.

It was pointed out that one-third of the total area of Canada lies in the Northwest Territories, that section comprising 1,300,000 miles of the Dominion's 3,500,000 miles. "This was the natural habitat and home of the Eskimo. Its commercial future seemed assured if it offered minerals, furs, and a territory splendidly adaptable for reindeer development."

As samples of exploitation of the territory, Capt. Munn cited the gradual extermination of the caribou and wild life. He called it the ruthless extermination of the caribou, which took away the source of the best clothing for the northern territories.

Regarding wild life exploitation, he said that in the last four years over five million dollars' worth of white fox had been taken out of the Northwest Territories. This represented 120,000 animals. If the rate kept up foxes would become scarce, except in remote parts of the country.

Stories were told of the hospitality and simplicity of the Eskimos, through which Capt. Munn found another avenue of expressing his favorable attitude to the Eskimo and his conviction that they should not be neglected by Canada, but assisted in every way.

Airtel Party "Frozen In"

A wireless message from the Maclean expedition in the Arctic regions was picked up at Magnolia, by George Warren, amateur radio operator, 23 years old, he reported. It read: "We are within a few degrees of the Pole and all is well. We are frozen in and will not be out until next Spring. At the present time the Arctic is under a mantle of the six months' night."

Brooms have been replaced by vacuum cleaners in the barracks of the French armies.

WORLD HAPPENINGS BRIEFLY TOLD

An extradition treaty between the United States and Poland has been signed at Warsaw after several years of negotiations.

Canada's trade with United States for the twelve months period ending October 31, was \$1,180,000,000 and exceeded the entire trade with the British Empire by \$437,000,000.

Mrs. Frances Wilson Grayson announced on her return from Europe that a third attempt to fly across the Atlantic ocean in the amphibian plane "Dawn" probably will be made during the winter months.

Sir Harry Lauder has received the freedom of his native city. The ceremony established a precedent, since he was the first professional comedian enrolled on the honor roll of Scotland's capital.

A train of 31 cars carried the first shipment of grain to the Halifax elevator this year, the shipment containing 61,000 bushels of rye, said to be part of one million bushels to be handled at that port.

George Sawyer, a member of the St. Noras Lake hunting party of Haliburton, Ont., was fortunate in securing a freak of the deer family in the form of a white buck. It was exceptionally large, weighing over 300 pounds.

The post of gold commissioner in the Yukon territory, which is now vacant will, it is understood, likely be filled by a promotion from within the civil service. The Yukon is administered by the department of the interior at a cost of \$180,000 a year.

In the last year, 147 Catholic priests have been executed in Mexico. W. P. Montavon, of the National Catholic Welfare Conference of Washington, told members of the Monday Club, an organization of social workers in New York.

More than half a million aliens were admitted to the United States during the 1927 fiscal year, and the number was considerably greater than during the previous year. The figures were 538,001 admissions in 1927, and 496,206 admissions in 1926.

Ronald Martland, son of John Martland, Edmonton's city architect, has been selected as Alberta's Rhodes scholar for 1928, and will proceed to Oxford next autumn. This is the 13th selection made at the University of Alberta.

New Distress Call For Radio Telephony

"May Day" Is Equivalent To SOS In Telegraphy

A distress call for use in radio telephony and to be the exact equivalent of the Universal SOS in telegraphy has been advised by the International Radio Conference here and has been incorporated in the new international wireless convention.

The new call for help is "May Day" to be spoken through the broadcasting apparatus. This would be followed immediately as in the case of a SOS by details as to the location of the origin of the distress call.

"May Day" is the phonetic spelling of the French word "maler," meaning "help me."

High and low tides may be predicted two years in advance for any port in the world by a recent calculation invention, consisting of 15,000 parts.

Rheumatic Pains

Gentle massage with Minard's will work out stiffness and drive away pain.

Teaching Hatred Of Britain

Rede Spending Unlimited Funds In China Says General Sutton

"The whole of Manchuria is now in the hands of the Bolsheviks and they are sending hundreds of agents supplied with unlimited funds into Southern China with the idea of raising hatred against Great Britain," General F. A. Sutton, picturesque soldier of fortune and promoter, told the Ottawa branch of the Engineering Institute of Canada.

The man, who for six years was military adviser to Marshal Chang Tso-Lin, head of the Peking government, declared that he had seen orders from the Moscow government, "directly advocating wholesale murder to stir up anti-British feeling."

According to General Sutton, 99 per cent. of the people of China were hopelessly poverty stricken. The urgent necessity of getting something to eat was the main consideration of the bulk of the population.

General Sutton thought the main source of trouble in China as it affected Great Britain was in Britain's lack of a strong policy. To a great degree the fact that practically the whole of Southern China was now pure Bolshevik came as a result of this policy, he declared.

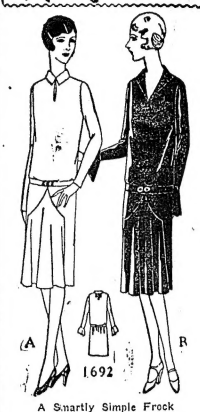

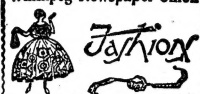

New Ruling For Settlers

Will Receive Medical Certificates Before Leaving For Canada

Interviewed in London on the recently announced intention of the Canadian Government to establish in Great Britain, Canadian medical officers for examination of intending settlers for the Dominion. Sir George McLaren Brown, European general manager, Canadian Pacific Railway, said that the new plan is being put into effect with the object of averting possible expense and waste of time to the migrant and of avoiding the possibility of rejection on arrival in Canada through failure to comply with Canadian medical regulations.

Under the new plan all who desire to settle in Canada will be medically examined free of charge before leaving their homes. This examination will be final and there will be no further examination to undergo on arrival at a Canadian port. It will also avert possibility of intending migrants giving up their positions or selling their business until they have passed the Canadian doctor.

Winnipeg Newspaper Union

Extremely smart is the modish frock shown here, having a group of tucks at the back of the neck, a convertible collar, dart-fitted sleeves, or long sleeves with flared cuffs, and a flared section at the front of the skirt. No. 1692 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 38 requires 3 1/2 yards 29-inch, or 5 yards 54-inch material. Price 29 cents the pattern.

The garments illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find here desires fulfilled in our patterns. Price of the book 10 cents the copy.

Question Of Naval

Limitation Shelved

Further Conference May Be Called Within Two Years

No negotiations in connection with a further conference on the question of naval limitation have begun nor are any contemplated for the immediate future, the Canadian Press learns. However, there is a definite feeling in British diplomatic circles that another conference, say in 1929, might produce valuable results inasmuch as it might considerably influence the cruiser program which otherwise would be in the process of being carried out two years later, when the Washington conference agreement will be due for review.

The decision not to proceed with two of the three cruisers which were to have been laid down this fiscal year is regarded as a gesture of the British Government to preserve a lively interest in the proposals for armament reduction.

Predicts Dominion

Rule For Scotland

Is Following Lead Of Free State Says Irish Nationalist

Dominion home rule for Scotland within ten years has been predicted by Jeremiah MacVeigh, leading Irish Nationalist and former member of Parliament.

"The nationalist spirit is sweeping Scotland as it swept Ireland," said MacVeigh, "and I am certain that within ten years Scotland will have the same form of government as has the Free State."

"Scottish freedom will not be won by the same means as was Irish freedom, but will come automatically and peacefully as the demand grows for freedom from the English Parliament."

Is Member Of Crew

Lady Colham is accompanying her husband on his present important flight, not as a joyrider, but as a member of the crew, her work being to act as secretary to Sir Alan, to serve as cook and to be ready to give first aid, in case of accident. The plane is equipped with cooking apparatus which can be used during flight and this Lady Colham will superintend.

Beggie—"What do you like most in me, baby?"

Marjorie—"Well, as I'm a baby, it must be because you're so right-headed."

Why Chinese Are Fighting

Brigand War Lords Robbing People For Their Own Enrichment

A writer in the press says that "if the Chinese know what they are fighting about it certainly gives them a most decided advantage over the rest of the world."

But if the rest of the world does not know, it is not because the rest of the world does not know, or because the newspapers of the world will not make the facts of the case known?

The broad outline of the trouble in China is that the country is being misgoverned and plundered by brigand war lords, who borrow money from the western nations, grant concessions to these foreign powers, and rob the Chinese for their own enrichment and to pay interest on their foreign borrowings. These war lords fight with each other if they have no other fighting to do, but for two or three years they have had plenty of fighting offered them by a civilian uprising against war-lordism, yoked as it is with foreign aggression.

The true interest of the western nations will eventually be found to be in China as everywhere else in the world, with the cause of civil and constitutional government as against rule by war lords and the sword. But, owing to bad management, the foreign powers have allowed themselves to be aligned on the side of the stiffers of Chinese freedom rather than on the side of those who struggle for it.

Remarkable Story

From London Hospital

How Messenger Boy Earned Money For Sister's Operation

When Prince Henry recently visited the Royal National Orthopedic Hospital in London, he heard from the nurses the story of a remarkable performance by a London messenger boy to effect the cure of his lady sister.

The boy, Alfred Garcia, then aged 12, heard his parents say that an operation which might cure his sister was too costly for their limited means. This was in 1923.

Learning that there was a circus in Sheffield where a lion-tamer offered \$1,250 to any one who would dare to venture into the lion's cage, Arthur Garcia, the boy's brother, accepted the lion-tamer's challenge and entered the cage. He received a cheque for \$1,250.

Now his sister, Esta, is able to walk. When the boy told his story to a Harley street surgeon and produced the cheque, the surgeon volunteered his services free. Esta had been in the hospital ever since, and the lion tamer's challenge was accepted by the hospital authorities. This was in 1923.

Relics Of Ancient Battle

Found Where Standard Was Planted At Battle Of Senlac

A few years ago, four miles from the spot on which King Harold planted his standard at the Battle of Senlac, near Hastings, England, a copper drum was dug up containing a leather bag with 2,000 silver pennies of Edward the Confessor's reign, believed to have been part of Harold's military chest.

Now, within a few yards of where the standard stood, Battle road excavations have unearthed an ancient battle-axe, some horse-shoes of ancient pattern, and a few bones.

When ghosts walk they probably enter houses with the aid of skeleton keys.

Winning candidates always say that it was a case of the office seeking the man.

New Carrier-Current System Inaugurated

New carrier-current system of combining commercial and railway telephone communication between Montreal, Toronto and Winnipeg, was given a remarkable demonstration in its inauguration recently by the C.N.R. Here A. E. Warren, general manager of the central region of the National Railway, Toronto, is shown talking to Winnipeg, while a telegraph message is being simultaneously transmitted. The service, it is estimated, will mark a saving the company of about \$1,000,000, and is the equivalent of 24,500 miles of new lines.

SUNDAY SCHOOL LESSON

DECEMBER 11

ISAIAH COUNSELS RULERS

Golden Text: "Thou wilt keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in Thee."—Isaiah 26:3.

Lesson: Isaiah, Chapters 7, 21, 36 and 37.

Devotional Reading: Psalm 21, 1-7.

Explanations and Comments

I. King Hezekiah Appeals To Isaiah To Pray To Jehovah For Deliverance From Sennacherib, verses 1-4. II. The Prophet's Answer, verses 5-7. "Thus shall ye say to your master," Isaiah made answer to the messengers from King Hezekiah, "Thus saith Jehovah, He is not afraid of the sword that thou hast heard, where with the servants of the King of Assyria have blasphemed me." Read the words in the preceding chapter of Isaiah (Isaiah 36) continued. "I will put a spirit in him, and he shall hear tidings, and shall return unto his own land, and I will cause him to fall there by the sword in his own land." "The spirit" was that of alarm. What the "tidings" were is uncertain. To quote G. W. Blunt-Brylson: "If chapters 36 and 37 are a unity, 'tidings' must refer to the news of the approach of Tirhakah, verse 36. If verses 1-7 here are independent of verses 36, the rumor probably relates to the tidings from home of a rebellion in Babylon, where, after expelling Nerodach-belshassar, he had set up a vassal king, who shortly afterwards revolted, and against whom he directed a campaign in 706. In the combination of the narratives mention of the fulfillment of the prediction about the return of Sennacherib in verses 37, 38, which form the sequel of this account."

"Isaiah's fervid faith in Zion's inviolability does not blind him to the openness of Judah's northern exposure; it is in one of his passages of earnest exhortation about Zion (Isaiah 38) that he describes the easy advance of the Assyrians to her walls. He and other prophets frequently recognized the warlike military powers will overrun Judah; and when they except Jerusalem from the consequences, it is not because of her national strength, but because of their faith in the direct intervention of God Himself. So at last it happened, in the great crisis of the Jewish history, the invasion by Sennacherib, Judah was saved, as England was saved from the Armada, neither by the strength of her harbours, nor by the fact that she had been burst, nor by the valor of her men, for the heart had gone from her, but because, apart from human help, God Himself crushed her instant foes in the moment of their triumph."—George Adam Smith.

Hopes League Can Avert War

Former French Delegate Says 1935 Will Be Crucial Year

The United States will not be on the same side as Great Britain in another European war, Henri de Jouvenot, former French delegate to the League of Nations, predicted in a letter read at the International War Danger Conference at London.

M. de Jouvenot, who recently resigned his League post as a protest against the policies pursued at Geneva, was to have addressed the conference, but sent a message, which was read instead.

The French statesman pointed to the holding up of the recent naval conference and said:

"Naval rivalry brings in its train concurrently with the growth of land armaments, rivalry of great states which are potential foes."

He predicted 1935 as a crucial year, until which the peace structure would hold good, but expressed the hope that by that time the League of Nations would have gained the authority necessary to prevent the recurrence of war.

Metal Light As Aluminum

Important Discovery Made By German Professor

A new alloy said to be three times as strong as iron, and as light as aluminum, has been brought to this country by its inventor, Dr. Max Wurmbach professor of metallurgy at the University of Munich.

The alloy, "neonallum," Dr. Wurmbach claims, is the most important discovery of the kind since the invention of duraluminum in 1907. A piano made of neonallum, he said, would be so light that it could be picked up by a small boy.

Growing Trees From Seed

The Land Department of British Columbia has leased a plot near Victoria city where forest trees will be grown from seeds and planted artificially to renew timber supplies for a future generation. The tiny trees will then be planted in various government timber reserves within the province.

An automatic distress signal broadcaster for ships and aeroplanes has been invented. It transmits SOS signals, the ship's call letters and the location.

Watches and clocks made in this country in the past year had a value of nearly \$2,000,000, the production breaking all records.

Cold Relieved or Money Back

Everywhere men, women and children are being relieved of colds and influenza by taking BUCKLEY'S Mixture. It is a cold remedy of all kinds by taking BUCKLEY'S Mixture. It is a cold remedy of all kinds by taking BUCKLEY'S Mixture. It is a cold remedy of all kinds by taking BUCKLEY'S Mixture.

W. K. Buckley, Limited, 414 Market Street, Toronto, Ont.

BUCKLEY'S Mixture

a single sip proves it

Scheme Is Proving Success

Socialistic Rule Has Passed Experimental Stage In Vienna

The city of Vienna has just entered upon its tenth year under Socialist rule. It is the only great city of millions of inhabitants which has been governed by a purely Socialist majority for so long a time—the only place where Socialist experiments have had a chance to be conducted upon so grandiose a scale and thereby develop beyond the experimental stage into view, from certain definite points of view, must be regarded as success.

Probably no city outside of Russia has had more hostile criticism than Vienna during the past decade. It has been denounced as Bolshevism; as a city being ruined by its rulers. Yet today students of municipal government come from all parts of the world to the Vienna town hall admittively to learn.

The first striking fact is that Red Vienna is as far removed from Red Russia as the poles. In Vienna, in fact, nothing is forbidden in the social order, provided one is able to pay. It all depends upon that. On the other hand, the doctrine of Karl Selts is definite—minimum happiness is due to every one and for that every one shall pay. Therefore, one may retain 40 servants if he deems that number necessary—and pay a tax sufficient to maintain an entire ward in the children's hospital for a year. But upon the theory that human service is necessary, servant No. 1 is not considered a taxable luxury.

One may own an automobile or twenty, providing one pays \$20 per horsepower annually. One may attend a cabaret and pay no tax on the liquor consumed, provided one pays the tax on the music. French champagne may be imported to the palate's desire provided the purse can stand the strain of the high tax that goes to the municipal building fund. One may ride a horse for pleasure and pay an annual tax of \$50, or may keep a horse for commerce and pay a tax of only \$5, or may even keep a horse to till the soil and pay no taxes whatever. Undoubtedly in some ways—perhaps in many ways—the new regime is still groping with difficulty. But, as the city fathers maintain, it is only nine years since the revolution and only seven years since the inhabitants have been able to get good square meals, therefore more time is needed to solve all problems.

Laundry Run By Peers

Solicits Patronage From Society People Residing In Mayfair

Dead-end telephones are ringing early these Monday mornings in Mayfair and a woman's voice says firmly, "My dear, I want your washer." The voice belongs to Lady Ossington, a peeress and a member of West End society, who has started a laundry.

She takes this method of coaxing her friends to sample her venture, assuring them that her laundry is one place where buckles won't come off white waistcoats and where there are no laundry marks marring handkerchiefs. Her husband, who is heir to the earldom of Tankerville, is London's pioneer aerial taxicab driver.

The government railway administration of India plans to construct 300 miles of new railway each year, beginning at once.

The Arctic tern, which flies from the Arctic zone to the Antarctic in its annual migration, covers a greater distance than any other bird.

"What? Two frames for having listened to the jokes of the proprietor?" "Yes. All amusements are paid for here!"

"Good. Then I will charge your proprietor two francs for having told me when I fell down the stairs yesterday."—Pages Gales, Yverdon.

A tea your grocer recommends is usually good tea

RED ROSE TEA "is good tea"

And most grocers recommend it.

Canadian Trade Prospects

With the close of the first six months of 1925, financial and commercial publications in Canada have been taking stock of the business situation throughout the Dominion. The conclusions reached by them as the result of careful surveys is that present conditions are better and prospects for the immediate future more promising than for some years past. This is especially true in regard to agriculture, and, as the West has always contained, a betterment in the farming outlook has a direct beneficial effect on manufacturing and all business.

Although actual returns from the farms are problematical until the crops are harvested, and it is never safe to closely estimate yields of grain and field crops until they are finally removed from all vagaries of weather, plant diseases and pests, the fact remains that at the end of June prospects throughout Canada, and especially in the Western Provinces, were better than for many years and, in the absence of widespread and extremely adverse conditions before harvest, the outlook is for one of the best and most profitable crops in ten years.

One financial paper in its annual review at the end of June states, on the basis of reports from all the Provinces, that the biggest increase in employment in two years has taken place, with the result that, except in the larger cities where the unemployed always congregate, there are few idle men. Manufacturing industries are busier than for years and in Ontario and Quebec real activity prevails with manufacturing near to capacity in several lines and some plants working overtime.

Record catches of fish on both the Atlantic and Pacific seaboard have taken place, immigration is increasing, the summer tourist traffic shows every indication of attaining a new high record, while the export trade of the Dominion continues to increase both in volume and value month by month. Building construction is likewise much greater than a year ago. Railway car loadings are smaller, but this is accounted for in two items, the smaller volume of last year's grain crop and reduction in the movement of coal resulting from labor troubles at the mines. On the other hand, there is a substantial increase in car loadings of manufactured articles and general merchandise, while this year's grain crop promises to more than offset the reduced volume of a year ago.

One of the significant developments is the steadily rising volume and value of Canada's export trade. For some years now the Dominion Government has been quietly negotiating trade treaties with other countries. One of the latest was with Australia and already British Columbia is looking forward to and preparing for a big expansion in trade with that sister Dominion. Before this article appears in print it is expected that the terms of a new trade arrangement with the British West Indies will be announced. Inasmuch as each and every one of these reciprocal agreements provides for the removal of artificial restrictions on trade through the lowering of customs duties and the wiping out of other obstacles to the free exchange of commodities, and are frequently accompanied by the provision of larger and improved facilities of communication and transport, the effect cannot be otherwise than to greatly enlarge Canada's markets abroad, and as repeatedly urged in this column, that is exactly what a young and growing country like Canada requires. Freer trade and wider markets are bound to bring about the Dominion's development leading to increased employment and production and resultant prosperity and growth in wealth.

A young country like Canada, with a comparatively small population, but huge resources and productive powers, and producing far more than its own people can consume, and already possessing manufacturing and other industries with capacities for production far in excess of the needs of home population, stands in need, not so much of protection of that restricted home market, but the removal of obstacles to trade with the world. We cannot grow strong and wealthy by merely trading with ourselves; that is too much a case of trying to lift oneself by the boot straps. Strength and wealth will come through producing for sale abroad, thus bringing into Canada the wealth derived through the sale of our products abroad.

A Modern Hercules

Tossed Around 600-Pound Safe Like A Toy

An undisciplined "strong man" at Patterson, N. J., with a vocabulary of only two words, tossed around a 600-pound safe, tipped the door off, pushed aside seven policemen and a store proprietor, dived through a plate glass window, knocked two men down and finally was captured, by means of a flying football tackle.

Somehow in the course of these activities he received some severe knocks on the head, one of which, physicians said, might prove fatal.

The man was unidentified because he could only say "all right." He appeared otherwise dumb and was not able to write.

A pianist playing a brilliant number will touch as high as 1,000 keys in a minute with one hand.

War Veterans To Unite

Ten Veterans' Organizations In Montreal To Join League

Montreal's ten war veterans' organizations, none of whom are united in the Dominion Veterans' Alliance, will all become members of the proposed Canadian league, either by amalgamation or affiliation, S. D. Cunningham, secretary of the Quebec council of the alliance, stated. He said all were sympathetic to the league and five have already expressed an intention to join. These were four branches of the Great War Veterans' Association, and the Tuberculosis Veterans' Association.

Insurance Agent—"My dear sir, have you made any provisions for those who come after you?"

Harrop—"Yes! I put the dog at the door and told the servant to say I'm out of town."

How Germany Solves Housing Problem

Families Allocated Space According To Number Of Members
They have a speedy method of solving the housing problem in Germany, according to an English paper, which says:

"You have here a flat of eight rooms; you are three in family. You will live, in future, in three rooms. Another family will move in next week to occupy the other five rooms. Good morning."

What would a British (or Canadian) householder say if an official said such a thing to him, and if he knew that he could neither protest nor refuse?

Yet that is what happens in Berlin every day. Next time we are inclined to grumble at hard conditions in our own country, it may help us to be more contented if we realize what the Germans put up with.

Rents are adjusted according to the number of rooms occupied in a house or flat. Thus, the family using five rooms in an eight-roomed house—with the original tenant inhabiting the other three rooms—will pay five-eighths of the rental.

NATURE'S WARNINGS

Danger Signals That Everyone Should Take Seriously

Pain is one of Nature's warnings that something is wrong with the body. Indigestion, for instance, is characterized by pains in the stomach, and often about the heart; rheumatism (stiffness) sharp pains in the limbs and joints; headaches are a sign that the nerves or stomach are out of order. In some ailments, such as anaemia, pain is not so prominent. In this case Nature's warning take the form of pallor, breathlessness after slight exertion, palpitation of the heart, and loss of appetite. Whatever form these warnings take, wise people will not ignore the fact that many diseases have their origin in poor blood, and that when the blood is enriched the troubles disappear. Dr. Williams' Pink Pills are most helpful in such cases because they purify and build up the blood to normal strength. In this way it tones up the nerves, restores the appetite and gives perfect results. Miss Hazel Bernitt, of Annapolis, Ont., has proved the great value of this medicine and says: "I am a young girl, I have been working in a factory for the past four years. For two years I had been in such poor health that at times I could not work. I was thin and pale, and troubled with headaches and fainting spells. I doctored nearly all this time, but it did not help me. My mother advised me to take Dr. Williams' Pink Pills, and after using them for a while I could notice an improvement in my condition. I used nine boxes and can truly say that my health is restored. When I began taking the pills I weighed 97 pounds and now I weigh 114. I feel that I owe my good health to Dr. Williams' Pink Pills and hope other ailing people will give them a fair trial."

You can get these pills through any medicine dealer or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Soviet Denies Intrigues

Would Avoid Any Action Which Could Be Regarded As Intervention In China

Foreign Minister Tschitcherine has issued a statement declaring that while the sympathies of the Russians are on the side of the Chinese in their struggle for complete liberation from foreign domination, the Soviet Government's policy is to avoid any action which could be regarded as intervention in China's internal affairs.

The statement was prompted by attacks upon Soviet Russia in the English newspapers in connection with the present situation in China. The foreign minister denies that Soviet Russia is carrying on intrigues in China against British trade or against foreigners in general.

The cheapness of Mother Graves' Worm Expurgator puts it within reach of all, and it can be got at any drugstore.

Another Title For Prince

The latest title granted to the Prince is that of "Alvinal Diamond Digger." An official certificate entitling him to this honor was presented by the "Digger's Committee" of West Borkley. He was somewhat amused when he was informed by the committee that the certificate is recorded "only to persons of indubitable honesty."

The Canadian Arctic

The merest glance at the map, or better at a globe, shows that if commercial aviation fulfills the hopes of its promoters the great intercontinental air lanes will lie in the far north. Siberia and Alaska will both have great importance, and so will any island found further north, even if it is only big enough to provide a filling station and enough level ground for an aviator to alight and take off—Springfield Republican.

SUNDAY SCHOOL LESSON

JULY 19

THE GOSPEL IN LYSTRA

Golden Text: Blessed are they that have been persecuted for righteousness sake; for theirs is the kingdom of heaven. Matthew 5:10.

Lesson: Acts 14:1-23.

Devotional Reading: Psalm 46:1-7.

The Text Explained and Harmonized
1. A cripple made to walk, verses 8-10.—There being no synagogue at Lystra, Paul began his preaching in the open air. Near him was a man crippled from birth; probably like the cripple whom Peter restored, he sat begging in his accustomed place. Paul noticed the cripple's eager attention to his words, and believing that the man had faith to be made whole, he said to him, "Stand upright on thy feet." Another manuscript (the Codex Bezae) reads: "In the name of Jesus Christ I bid thee rise and walk." This was just what the man had never been able to do. Compare Christ's words to the man with the palsied arm—"Stretch forth thy hand"; the impossible, happened in both cases; the cripple leaped up and walked.

2. The people seek to worship Paul and Barnabas, verses 11-13.—Seeing the cripple walking, the people were so amazed that they cried out in the speech of their province (Lycaonia), "The gods are come down to us in the likeness of men." Egyptians and Greeks believed that the gods often assumed human bodies and visited the earth to reward the good and punish the evil. Homer, Vergil and Ovid record many such visits. Cowper translates a passage from Homer thus:—

For, in similitude of strangers, oft
The gods, who can with ease all
shapes assume,
Repair to populous cities, where they
The outrageous, and the righteous
deeds of men.

A special legend of the coming of Jupiter and Mercury to the very region (see the second topic) made it natural for the people to call one of the apostles Jupiter and the other Mercury.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites can not exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

You never can tell. Some people aim so high they never hit anything on earth.

Excellent for Croupy Children.—When a child is suffering with croup, it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and soothes the inflamed, giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, catarrh, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

Yellow fever destroyed thousands of Frenchmen in the early eighties, who attempted to dig the Panama Canal.

Cuticura Talcum
Is The Ideal Powder

Is purity, smoothness and fragrance, combined with antiseptic and prophylactic properties which help to overcome disagreeable skin conditions and prevent their return. It is an essential toilet requisite.

Sample made free by Mail. Address: Canadian Talcum Co., 250, Queen St. W., Toronto, Ont. 25¢. Cuticura Shaving Stick 25¢.

Germany's Obituary For Earl of Ypres

Reliable and Honorable Soldier Says General von Kuhl
General von Kuhl, Germany's leading authority on what is known here as "scientific militarism," in writing a long obituary notice on the Earl of Ypres in the Deutsche Allgemeine Zeitung, quotes freely and sympathetically from both Colonel Reginston and Lord Ypres' own memoirs. In summing up, he writes:

"The picture which history has to show of him is that of a reliable and honorable soldier, who always did honor to England's name, whenever he appeared on the field of battle, and whose adventures are bound to do him honor, too. But he was not a great military leader, for, whenever fate confronted him with such tasks he showed that the sacred fire did not burn within him, and that daring and boldness were not his strongest points."—Berlin Correspondent of London Observer.

Sour Stomach Risings Quickly Relieved

The wonderful comfort and relief you get from even twenty drops of Nerville will surprise you. Take it in sweetened water; it's not unpleasant. Almost immediately you feel better. Nerville brings up the gas caused by fermenting food, and at the same time relieves that distressed feeling in the stomach. When colic or cramps strike you at night, when nausea or upset stomach overcomes you, then it is that you'll find Nerville a sure relief. For general use in the family, for emergent tils, always keep Nerville handy on the shelf. Get a 35c bottle to-day.

Connect West Coast With the Prairies

Last Link in Motor Trail Now Being Completed

Before the end of the present year the Fraser River canyon route will be completed and British Columbia will have constructed the last link in the chain of roads that will connect the west coast of Canada with the prairies. Construction has been rushed along the Fraser during the summer months, with the result that progress has been even more rapid than was at first expected and the road may be completed before the first snow falls.

For years the trans-continental highway has existed with one single gap—that between Hope and Princeton. Now that gap is being bridged and when the road is finished it will add one of the most scenic highways on the continent to the all-Canadian artery. The possibilities of the route in the development of tourist traffic between the coast provinces and the prairies are regarded as beyond calculation.

A Double Alarm

"Glad to see you getting in on time these mornings, Mr. Slove," said the manager.

"Yes, sir, I've got a parrot now."

"A parrot. What for?" I advised you to get an alarm clock."

"I did, sir, but after a few mornings I got used to it and it failed to wake me. So I got a parrot and now when I retire I hang the alarm clock over his cage. It wakes the parrot and what the bird says would arouse anybody."—Boston Transcript.

6,000 Miles of Roads

"The province of Quebec now has 6,000 miles of modern improved roads, including a complete system of trunk highways and county or market roads, and a large number of local roads," says the Quebec official bulletin of the roads department. "These 6,000 miles of roads represent thirteen years of strenuous and sustained work. They cost, in construction, repair and maintenance, over \$60,000,000."

Minard's Liniment for Sore Feet

Brought Millions To Canada

Since the British cattle embargo was lifted on April 1, 1923, 158,859 head of cattle had been shipped to Great Britain up to May 31 last, and the estimated value to Canada of these exports is \$14,135,715. This was stated in the commons in answer to a question.

Powerful Medicine.—The healing properties in essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most successful liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that the cure effected by it. Its wonderful power is not expressed by the small price at which it sells.

Scientists, who are tracing future paths of earthquakes, state that America is safe, owing to the great depth of the mountainous land formations.

Minard's Liniment for Neuralgia

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

WRIGLEY'S

Sends Radio Pictures In Natural Colors

Washington Man Proves Success of His Latest Invention
C. Francis Jenkins, the Washington inventor, successfully demonstrated his latest invention, "radio vision," to Secretary of the Navy Wilbur and other U. S. Government officials. Mr. Jenkins has also revealed the fact that pictures may be sent by radio in natural colors.

"It is well known that pictures in color are in common use in magazine printing, in window transparencies and decorations," Mr. Jenkins explains, "the process consisting in making three negatives, one through a red screen, a second through a green screen, and a third through a blue screen. When transparencies from these three negatives, each stained in its complimentary color, red, green and blue, are superimposed and viewed by transmitted light, the resultant picture is seen in its natural colors."

FOR DIARRHOEA DYSENTERY AND ALL SUMMER COMPLAINTS

DE FOWLER'S EXT-O-F WILD STRAWBERRY

Gives Instantaneous Relief

It has been a household remedy for over 50 years. You can always rely on it in time of need. Manufactured only by The T. Millbrae Co., Limited, Toronto, Ont.

The Professional Farmer

Farmer Must be a Specialist Highly Educated in His Business

Stock farming methods do not pay is generally accepted; but that stock farming methods are a waste of national assets and an injury to the landless population must be a creed of the future. Already there are abundant signs that the farmer must be a scientist highly educated in his business and understanding to the last point the natural forces which he calls into play. As such he will take his place as a professional man—the most highly respected professional man of all.—Sydney Bulletin.

New Thermometer

A newly invented thermometer registers both indoor and outdoor temperature. For the outdoor temperature the bulb is placed outside the window and a tube runs into the room.

Minard's Liniment for Sore Feet

Brought Millions To Canada

Since the British cattle embargo was lifted on April 1, 1923, 158,859 head of cattle had been shipped to Great Britain up to May 31 last, and the estimated value to Canada of these exports is \$14,135,715. This was stated in the commons in answer to a question.

Powerful Medicine.—The healing properties in essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most successful liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that the cure effected by it. Its wonderful power is not expressed by the small price at which it sells.

CHILDREN CRY FOR

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of **W. C. Fletcher**. Proven directions on each package. Physicians everywhere recommend it.

Winter Care of Swine

At the approach of winter a very important part of the farm work is to provide healthy and comfortable sleeping quarters for swine.

It has been found at the Dominion Experimental Station at Scott, as well as at several other Stations, that a pig may be in a comfortable building and yet the conditions may be conducive to poor health. It has been shown, repeatedly at Scott that pigs wintered in small straw sheds, or cabins banked with straw and manure, are more healthy and vigorous than those wintered in the piggery and no cases of crippling have resulted from wintering outside.

The piggery building is celled inside and has a slatted ceiling with straw overhead. The swine in this building get very little ex-

ercise and practically no sunlight, both of which are provided in case of the straw sheds by their being located some distance from where the feeding is done. During extremely cold and stormy weather a windbreak is provided while eating. This usually consists of portable cabins containing the troughs, but no straw is provided in the cabins to encourage sleeping in them.

The crippling of swine in winter is now generally believed to be rickets, resulting from a lack of sunshine and exercise, rather than rheumatism, as it has often been diagnosed.

Some idea of the amount of business transacted by the Wheat Pool can be gained from the amount of mail despatched which totalled 518,378 during the year, or an average of 1700 pieces for each working day.

Winter Colds and How Cure Them

A cold is not a recognized cause of death, yet it is in danger of soaring to the highest place among causes of death, carried thither by the recognized dangerous diseases. Colds are usually very contagious, the infection being spread by drops of mucus sprayed in the air through coughing, sneezing or speaking. Contact with persons who have had colds must be avoided and when the children cough and sneeze and have running noses, then mother should keep them at home until cured. Inflamed tonsils, adenoids and nasal growths are all predisposing factors in colds as they act as centres of infection. It is desirable to have them attended to at once.

Do not overheat your home. Keep it around 65 degrees Fahrenheit. That is a good tempera-

ture. Here in the west we often err in overheating our houses, and add to that sin the evil of a bad system of ventilation. It is no wonder in such an atmosphere that colds spread through a family, from the family to the school, or all over the town.

The treatment for a cold is simple enough. "Go to bed at once and stay there till better" is the advice of a well-known doctor. Drink lots of water and such drinks as hot lemonade, black currant juice are all excellent. Drugs should only be taken under the doctor's advice. Hot foot-baths (about 110 F) are effective followed at once by bed. Do not try to "check a cough," rather try to expectorate, as this relieves the congestion. Rub the chest with warm camphorated oil. Avoid all quack remedies and so-called catarrh cures.

If there is high fever, call your

doctor at once, you will lessen the danger of complications, the symptoms of which cannot be always recognized by the patient's friends.

To "coddle a cold" may cost you the loss of a few day's work or amusement; to neglect it may cost someone his life, for the chain of infection is never-ending.

Valuable health literature on the subject of colds is obtainable free of charge from the Red Cross Head Office, 408 Civic Building, Edmonton, Alberta.

Settler Question One Of Selection

With the influx of a horde of immigrants from all parts of Europe, expected to flock to Alberta as a result of the world-wide interest being taken in the west at the moment, this province will have to exercise care that immigrants of the right type—those who will prove easy of assimilation—

and not undesirable, will become settlers here, was part of the message given by the premier, Hon. J. E. Brownlee, to the convention of the Civic Service Association of Alberta, on Friday, Nov. 25th.

It was apparent, Mr. Brownlee observed, that even the flood of immigration which had entered the province this year, would tax all its powers of assimilation, and he added that the importance of getting the right type of immigrant had attracted considerable attention at the conference of premiers in Ottawa, from which he had just returned to the west.

It was no longer a case of getting immigrants to come to the west, but of seeing that the right kind came here, the premier pointed out.

"Grits like men with smooth manners," a writer declares. The oily worm catches the bird.

The NEW CAR

INTRODUCING A FINE CAR IN THE LIGHT CAR FIELD

THIS entirely new car surpasses the accepted standards of light car accomplishment; sweeps aside all boundaries of price class; establishes a new standard of acceleration, speed, power and smoothness. Hereafter the following characteristics have been combined only in expensive cars.

Speed—better than a mile a minute.

Acceleration—5 to 25 miles per hour in high gear in 8½ seconds.

Endurance—this car will travel all day at 50 miles per hour without strain on motor or chassis.

Riding comfort—flexible springs and four hydraulic shock absorbers permit comfortable travel at high speed over the roughest road.

Roadability—this car's low center of gravity holds it snugly to the road on an unbanked turn even at high speed.

Power—in deep, loose sand with the front wheels cramped and from a dead stop, the car will turn in a tight circle, forward or reverse, without effort.

Effective braking—the instant response of mechanical, four-wheel brakes with dual control ensures positive braking for any emergency.

Positive steering control—A relaxed hand on the steering wheel will hold the car steady in loose sand and over bumpy roads. Turning radius 17 ft.

Economy—30 miles per gallon of gasoline, plus the well known economy of Ford car maintenance.

Appearance—coach work of pleasing proportions, tastefully finished in an extensive range of color combinations of durable satin lacquer.

Quietness—Vibration in the engine is practically negligible. New final drive is exceptionally quiet. Double-ply anti-squeak tape, asphaltum treated fabric and hardwood blocks between body and frame minimize body noises.

Motor

Make and Model—Ford "A"
Four Cylinders—Bore 3¼"; Stroke 4¼"
Unit Construction
Pump and Thermo-Syphon Cooling
Pump, Splash and Gravity Lubrication
Single Coil Distributor Ignition
Sliding Gear (3 speed) Transmission
Multiple 9 Plate Dry Disc Clutch
Crankshaft—Statically and Dynamically Balanced
High and Low Speed Jet Carburetor (hot-spot manifold)
Aluminum Pistons
Oil Indicator
Two Blade Aeroplanes Type Fan
Rebelized Fabric Timing Gear
Carbon Chrome Nickel Alloy Valves
N. A. C. C. Rating 24.03 H. P.—Actual
Developed H. P. 40 at 2200 R. P. M.

Tudor Sedan

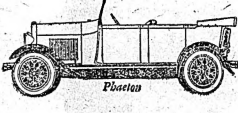

Fordor Sedan

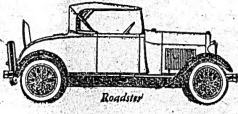

Sport Coupe

Coupe

Phaeton

Roadster

Engine—At 2200 revolutions per minute the new four cylinder engine develops 40 H. P. This revolution speed is low for such power and sets an entirely new standard for light car speed and acceleration, enduring quality and operating economy.

Engine lubrication—Combination of pump, splash and gravity feed thoroughly lubricates all frictional surfaces regardless of road grades.

Cooling system—Combination water pump and Ford thermo-syphon system doubly insures ample radiation. Engine warms up quickly but will not overheat.

Electrical system—The new Ford designed distributor is placed on top of engine permitting direct connection to spark plugs by means of short bronze bands. The single coil is protected by a waterproof case. Co-incidental lock on ignition circuit is their proof. The powerful starting motor and dependable generator are both of Ford design.

Clutch and transmission—Patterned after the famous Lincoln, these units give an operating ease never before found in moderate priced cars. The nine-plate multiple dry disc clutch and the selective transmission are designed to make shifting of gears remarkably easy and simple. Getaway, unexcelled by any car made today, is just one of the many advantages. Three speeds forward and one reverse. All gears are made of heat-treated chrome-alloy steel. The only light car in which transmission shafts are mounted on ball and roller bearings.

Rear Axle—The axle shaft itself carries no weight as the ¾ floating principle places the weight of the car on the axle housing. Flexible roller bearings minimize wear wheel friction. A Torque Tube drive and spiral bevel gear are additional features.

Springs—Transverse semi-elliptic design. Relieved of all driving strain, they perform the sole function of cushioning road shocks. The transverse type of spring helps to prevent a large amount of frame distortion, makes four-wheel brake operation more efficient, gives easier steering and reduces unsprung weight.

Chassis lubrication—Alomite-Zerk pressure system.

Equipment

Starter
Foot Accelerator
One Piece Windshield Equalizer
Sun Visor
Thief Proof Ignition Lock
4 Hydraulic Shock Absorbers
Wide Range of Color Options

Chassis

4 Wheel Brakes—Mechanical Internal Expanding Type with Automatic Equalizer
Springs—Transverse Semi-Elliptic Drive—Torque Tube Gears—Spiral Bevel
Rear Axle—Three-Quarter Floating
Full Crown One Piece Fenders
Gravity Feed Fuel Tank
Ignition Wires Enclosed in Flexible Steel Tubing
Steering Gear (Irreversible)—Worm and Sector Type
Accord Design, Nickel Plated Headlights
5 One-Piece Steel Spoked Wheels
17½" Steering Wheel
Alomite-Zerk Pressure Lubrication
Body and Chassis Insulated to Prevent Noise
Wheel Base 103½ Inches
Turning Radius—17 feet
Tire Size—30 x 4.5
Road Clearance—9½ inches

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

HAS EXERCISED OPTION ON FLIN FLON PROPERTY

Toronto.—The Mining Corporation of Canada Limited announces that Harry Payne Whitney has exercised in full his option to purchase the Flin Flon properties. The corporation retained a 15 per cent. interest, and also acquiring a 15 per cent. interest in all claims and interests separately owned by the Whitney interests in the Flin Flon district.

Payment in full of the purchase money has been made cash, the corporation receiving \$850,000. The original option provided for payment of much the greater part of the purchase price in bonds secured upon the property, maturing over a period of years, but not bearing interest until Sept. 1, 1923. Subsequent negotiations resulted in these terms being altered and a cash purchase price being agreed upon. From the time received the corporation, in accordance with the terms of the original option is contributing slightly less than \$75,000 towards the expense incurred in connection with the experimental work carried on at Denver and on the properties themselves, which expense tallied almost \$1,500,000.

Montreal.—An official announcement issued from the headquarters of the Canadian National Railways here, said that the contracts for the construction of the Flin Flon branch line in Northern Manitoba have been let to the Dominion Construction Company, Ltd., and Tomlinson Company, of Toronto and Winnipeg.

Report Shows

Irak Prosperous

Industry Is Flourishing and Labor Troubles Non-Existent

Jerusalem.—While the past year was anything but a prosperous one in Palestine, Syria or Egypt, the economic condition of Irak during 1926 and the first half of 1927 was good.

Recently, the Permanent Mandates Commission of the League of Nations took note of the report which was submitted to it by the High Commissioner for Irak, Sir Henry Dobbs, for the year 1926, in which it was pointed out that the country had progressed satisfactorily.

The revenue of the Government has exceeded the estimates by over 8 per cent. Labor trouble was practically nonexistent while industry was flourishing.

Reports from Baghdad show that this state of affairs has continued unabated.

Was Missing Sixteen Years

Woman Mourned As Victim Of Titanic Disaster Returns Home

Conville, Leicestershire, England.—Mourned for nearly 16 years as a victim of the Titanic disaster, Mrs. Robertson walked into her old home at this place a day or two ago and nearly frightened her aged mother to death.

When she left Conville she had booked passage on the Titanic, but at the last minute changed her plans. About her mysterious doings in the long interval, during which her father and four brothers and sisters died, she would say little. She explained she had married and done war work in Germany and had been captured by the Germans.

The Titanic, on her maiden voyage from Southampton to New York in April, 1912, struck an iceberg off Newfoundland and foundered. More than 1,500 persons perished in the disaster.

Large Orange Shipment

Vancouver.—Importation of Japanese oranges through Vancouver reached a new high mark when three steamers arrived from the Orient recently carrying a total of 500,000 boxes for distribution in British Columbia and every other province in the Dominion.

Jewelry Found In Cella

Barrie, Ont.—Stolen jewelry has been located hidden in the cells at the county jail occupied by Fred Fryer and Dennis Berlin, who were sentenced to two years for the theft of several rings. The men had refused to tell the whereabouts of the missing rings.

Reproduce Royal Christmas Cards London.—Reproductions of the Christmas cards prepared for the Royal Households by a London firm are to be available this year to the members of the public by permission of the King and Queen, the Prince of Wales, Princess Mary and the Duke and Duchess of York.

W. N. U. 1710

Casualties Heavy In Ukraine Revolution

Has Cost 5,000 Lives In Three Months Says Report

New York.—Suppression of a revolt in the Ukraine at a cost of 5,000 lives during three months of bitter fighting is reported in a special copyrighted despatch from Kishineff, Bessarabia, to the New York Times.

The despatch telling of massacres and street clashes in towns along the Dniester, which forms the Russian Rumanian boundary line, confirms in large measure recent despatches to the Associated Press from Bucharest citing an account of fighting in the Ukraine reported by the Rumanian newspaper Dimineata.

Soviet reinforcements, which have arrived in the Ukraine in the past two weeks turned the tide of the revolutionary movement and after a series of clashes in various towns the revolt was crushed out in a bloody disaster for the revolutionaries.

Soviet officials have made denial of any extensive revolt in the Ukraine, specifically denying any fighting at Kamenez-Podolsk, but the sound of prolonged firing beyond the Ukrainian hills can be heard daily from the Rumanian side of the frontier, the despatch says.

Montreal Merchants

Outwit Burglars

Leave No Money In Store After Closing Hours

Montreal.—Thieves operating in Montreal have, for the past few months, apparently acquired a penchant towards repeating their exploits in the name establishments. But the harassed shopkeepers have arranged in their own way means of making the work of the marauders as unremunerative as possible.

Over last week-end thieves entered a branch of a chain grocery company and carried off the cash. That was their fourth visit in two months. The management, however, had one of the employees carry the money home, so that the strong-armed men received nothing but a lot of trouble for their pains. On the previous three visits the robbers secured \$500 and three safes.

Changes In British

Cabinet Inevitable

Rumor Is Causing Much Speculating By London Newspapers

London.—A cabinet shuffle is inevitable early in the coming year and already newspapers are speculating on the changes. It appears probable that Caudill Lister, Mr. Bridgeman, first lord of the Admiralty, and Col. Ashley will be elevated to the House of Lords, and that their position in the cabinet will be filled by younger men.

Provisional members of the Conservative party are making demands for better representation in the government, and are very much dissatisfied with the present administration. This feeling is resulting in considerable dissension within the party, which must be unified before the next election looms in sight.

Cost Of Canada's Army

Expenditures For Year Total \$10,402,651 According To Report Ottawa.—Military services in Canada during the year 1926-27 necessitated expenditures totalling \$10,402,651 according to the annual report of the Department of National Defence. This figure does not include \$809,154 for general air services. In the year 1917-18 the grand total of military service expenditures was \$329,744,270 and for the next two years the expenditures were in excess of \$300,000,000.

Flying operations by the Royal Canadian Air Force during the year showed a total of 5,229 hours of flying time, covering service flying, forest protection, aerial photography and fishery protection.

The active militia strength on March 31, 1927, was placed at 9,129 ranks, other than commissioned officers.

Has Approved Agreement

Ottawa.—The Government has approved by order-in-council the agreement between the Canadian National Railways and the City of Vancouver, announced Hon. C. A. Dunning, Minister of Railways and Canals. One of the provisions in the agreement calls for the building of a new hotel in Vancouver at a future date.

Must Pay License Fee

Meese Jaw.—Dr. H. J. Standforth, Chas. Standforth, will have to pay a transient traders' license fee according to a decision reached by city council here. The doctor is giving a series of lectures in this city on matters pertaining to health.

Commuter Lost Fight Against New Ruling

Was Advised To Submit To Border Immigration Law

Buffalo, N.Y.—The first attempt of an alien to fight the border immigration ruling was lost when Judge Hasko, in district court, dismissed an application for a temporary injunction to restrain immigration officers from enforcing the ruling.

The injunction was sought on behalf of James Kemp, of Niagara Falls, Ontario, who is owner of a business establishment in Niagara Falls, N.Y. Judge Hasko, commenting on the action, advised Kemp to submit to arrest for illegal entry across the Niagara river and then to apply for a writ of habeas corpus in order that his action may be brought before the district court.

The new immigration ruling which became effective December 1, provides among other things, that Canadian nationals, who commute to this country, must have visas and pay a head tax of \$25.

SOVIET RUSSIA PROPOSES THAT NATIONS DISARM

Geneva.—Soviet Russia has challenged the entire world to disarm.

The Russian delegation to the disarmament commission of the League of Nations offered to destroy her land, sea and air forces, provided other nations would do the same.

The stupendous proposal left the other delegates bewildered and groping for an answer, but with the impression that Russia had woven the peace fabric of Europe. However, the general impression, except possibly among the Russians, is that total disarmament is an idealistic dream for the present at least. Nevertheless, there is everywhere a disposition to give the Soviet leaders full credit for their readiness to wipe out armaments.

That the Russians themselves realize their plan to lay down all arms and make their manufacture impracticable is too idealistic for the present at least, was shown in the opinion of many by the fact that they voiced their willingness to negotiate in a placid form for the reduction of armaments if their radical project proved too revolutionary, and that they did not insist upon immediate consideration in detail of their sweeping programme. Such consideration was adjourned until the next session of the commission early in 1928.

Furthermore, although contending that complete disarmament is the best guarantee of security, the Russians, in a spirit of conciliation agreed to send an observer to the special committee on security. It will tackle the problem of how best to increase guarantees of security in order that the nations of the world may be more willing to cut down armaments when the international conference is convoked, probably some time next year.

Refused Decorations

COL. T. E. LAWRENCE

who lived with the Arabs with a price on his head, organized them to drive the Turks out of Syria during the war and made Emir Faisal king of Iraq, and then refused the decorations offered to him by King George according to recent disclosures. He is said to feel that the Arabs didn't get a square deal when they fought under him with the understanding that they would be allowed to keep Damascus and Syria after the war.

Exhibition Dates Set

Announcement Made At Annual Session Of International Association

Chicago.—The Canadian National Exhibition will be held at Toronto, August 25 to September 8, next year, according to an announcement made by the International Association of Fairs and Exhibitions in annual session here.

Other dates for Canadian exhibitions decided upon for associations affiliated with the international association were announced as follows: Calgary exhibition and stampede, Calgary, July 9 to 14.

Central Canada exhibition (Ottawa), August 21 to 26.

Edmonton exhibition, Edmonton, July 16 to 21.

British Columbia provincial exhibition, New Westminster, B.C., September 3 to 8.

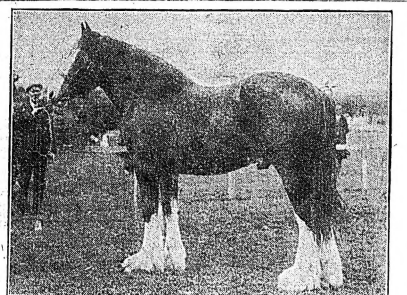

Saskatchewan's provincial exhibition, Regina, July 30 to August 4.

Law Serves Its Purpose

Sacramento.—The new state law requiring a three-day notice before a marriage license can be issued has reduced the number of marriages in California by 20 per cent. During the first month it was in effect, the regulation brought a decrease of 500, indicating that many couples had been frustrated.

World's Chess Champion

Buenos Aires.—Alexander Alekhine, Russian chess-master, won the world's chess championship when Jose R. Capablanca, the title-holder since 1921, resigned the thirty-fourth game of the series without making play, adjourning after 31 moves. The score was six to three victories. The 25 drawn games did not count.

A Ten Thousand Dollar Two-Year Old

The international aspect of the Royal Winter Fair at Toronto was emphasized strongly this year by the exhibition of a large shipment of champion stallions from England, Scotland, France and Belgium. The horses, including Clydesdales, Percherons, Suffolk and Belgians, were brought to Canada in October by W. J. McCallum, of Brampton, Ontario, and Regina, Sask. The shipment arrived on the Canadian Pacific freighters Dolgobrook and Howarth, and represented what is considered the finest assignment of horses ever to cross the Atlantic.

A notable stallion with the group is "Lord Willington," photographed above, a Clydesdale champion many times over and considered one of the finest ever bred overseas. While the shipment proper, including over 100 horses, will be sold by Mr. McCallum throughout the west this winter, "Lord Willington" will be taken back to Scotland by the owner to be used for breeding purposes. This horse was purchased by Mr. McCallum at a price exceeding \$10,000. It was the only two-year-old winning, double champion in Scotland this year, being champion at the Royal Show, Newport, Wales, and champion at the Kilmarnock Show.

Mr. McCallum's optimism for the horse industry in Canada has prompted him to spend about four months each year touring the four equine mentioned and making a personal selection of the stallions available for export.

Hazing Barred From Agricultural College

Hon. J. S. Martin Gives Ruling Affecting Guelph School Toronto.—Hazing or initiation practices at the Ontario Agricultural College, Guelph, have been banned by Hon. J. S. Martin, Minister of Agriculture.

The minister's action was prompted by the recent hazing of Edward Dodson, young English student at the institution who was imprisoned in a pig crate and "auctioned" off in front of a crowd in the streets of the city a short time ago.

Mr. Martin takes the ground that hazing is, in effect, little short of mob law in a mild form and states that students who participate in any future affairs of this kind may be immediately expelled from the college.

Serious Floods Near London

People In Low Lying Country Forced To Leave Homes

London.—Serious floods in many places, especially in the low country to the West of London, followed a heavy 24-hour rainfall which accompanied a black fog over the city. The rainfall exceeded half of the average for the whole of November.

The little river Brent burst its banks, flooding scores of houses near Grafton. Police entered the district quickly to awaken the inhabitants who had to leave their beds hastily to save what they could.

Miles of the district were under water, and the roads were impassable. The local electric plants were flooded, cutting off light and increasing the difficulties of the area.

Would Abandon His Title

Japanese Prince Holds Himself Responsible For Bank Failure

Tokyo.—Prince Iwano Matsukata, holding himself responsible for the failure of the financial bank, called the Peers Bank, because its stockholders and directors numbered most of the Japanese peerage, has requested permission to abandon the title.

The Prince, who was managing director of the bank, has decided to sell his remaining property, donating the proceeds to the settlement of the bank's affairs. The Prince, who was a multimillionaire before the bank's failure last April, is now living in a small house on the outskirts of Tokyo.

Canadian Doctors In London

Will Examine Immigrants From England Before They Sail

London.—Twenty doctors from Canada have arrived here for the inspection of potential migrants from this side of the Atlantic to the Dominion under the pre-embarkation medical examination scheme which has been placed in operation by the Canadian department of public health.

It is hoped that by testing the fitness of prospective immigrants before they sail, the possibility of their rejection on arrival in Canada will be practically eliminated.

OATS TROPHY AGAIN WON BY HERMAN TRELLE

Chicago.—Canada retained the oats sweepstakes for the best oats grown in the North American continent through Herman Trelle, Wenbury, Alberta, at the International Grain and Hay Show here, L. E. Patterson, Victor, Montana, taking the reserve championship.

Mr. Trelle kept the oat crown which he won in 1926 with a fine sample of Victory oats weighing 49.6 pounds to the bushel, United States measure.

Canada has won the oats championship six times, and Montana twice. By winning today the Canadian exhibitor stopped Mr. Peterson from taking the trophy as his own property for a third win. Next year Mr. Trelle will have an opportunity of lifting the trophy.

All the winning seed grain samples are placed in a gold plated glass case under lock and key in gold plated boxes. The blue ribbons denoting championship taken by the exhibit are laid on top of the grain. Above the glass is a big map with golden circles showing that the field peas championship went to Saskatchewan and the oats sweepstakes to Alberta.

George Avery, Kohn, the only Saskatchewan entry in early cuts, was the first Canadian exhibitor, taking tenth prize. L. E. Patterson, Victor, Montana, won and Maurice Larcombe, Birle, Man., was eleventh and Samuel Larcombe, Birle, Man., fourteenth, and Larcombe, Birle, Man., fourteenth.

BIG MAJORITY IN BY-ELECTION FOR HON. GEO. SPENCE

Gull Lake.—When the last returns had been received by Returning Officer Richard A. Harris, Hon. George Spence, recently named Minister of Railways in the Saskatchewan cabinet, had a substantial majority over his opponent, Charles Frederick Colburn, independent Progressive, in the provincial by-election for Maple Creek constituency. With 37 polls reporting out of 52, Mr. Spence had a total of 1,023 to Mr. Colburn's 396, or a majority of 627. Some time will elapse before the final figures are known, as some of the polls cannot be reached by telephone or telegraph, and travelling is extremely difficult owing to the condition of the roads.

Independent Progressives here expressed themselves satisfied with the result although some were disappointed at the small vote.

From present indications Mr. Spence will take Mr. Colburn's deposit.

Workers for both parties were busy from the minute the polls opened until closing time, but in a number of cases, cars were stalled making it difficult to get the people to the polling booths on time.

Early returns indicated the election of Mr. Spence by a substantial majority, and the issue was never in doubt after the first ten returns had been received. It is estimated that about one-seventh of the vote turned out to cast ballots today. There are approximately 14,000 names on the voters' lists.

Hungarian Prince

Inherits Fortune

Is Serving Penitentiary Term For Forging French Francs

Budapest, Hungary.—The recent death in Czechoslovakia, of Prince Alfred of Windisch-Graetz, leaves a vast fortune in the hands of Prince Ludwig of Windisch-Graetz, who is serving a penitentiary sentence for forging French Francs. Prince Ludwig, who was virtually penniless by becoming heir to his uncle's fortune once more will be well supplied with funds. It is believed that he will be pardoned and in the meantime expects to receive permission to attend his uncle's funeral.

Prince Alfred was former President of the Austrian upper house and a former Premier of Austria-Hungary. He belonged to one of the ancient feudal houses of the old Austro-Hungarian empire.

Norwegian Scientists

Going To Antarctic

Will Make Study Of Continent Near South Pole

London.—A party of Norwegian scientists and explorers have left Norway for Cape Town, whence they will start on board the Antarctic steamer Norvegia to explore the South Atlantic continent. The captain of the Norvegia will be Captain Hornvott. Several naturalists will be included in the company.

Afterwards they will go to the South Shetland Islands to study the flora and fauna. The scientific leader of the expedition will be Professor Holstvedt and the captain of the Norvegia will be Captain Hornvott.

Several naturalists will be included in the company.

Bengal Swept By Plague Calcutta, India.—A cholera epidemic is sweeping Bengal.

Three thousand seven hundred and three cases, with 2,123 deaths, have been reported from all parts of the province, with the exception of Calcutta, for the week ending November 15.

It is estimated here that if the epidemic follows the ordinary course, it will increase 50 per cent. in December.

Vancouver Is Recommended

Vancouver.—Officials of the Imperial Aeronautical Association of Japan have been called by Y. Miaw, air attaché of the Japanese embassy at Washington, recommending Vancouver as the terminus of the Japan-Pacific flight which will be attempted next year.

Shipping Milk To Orient

Vallejo, Cal.—Americans living in the Orient soon will have fresh milk from coastal cows. A dairy company here is shipping several hundred gallons of milk to Shanghai and Singapore, using the same methods of refrigeration employed by fruit exporters.

The Prevention Of Smallpox

Vaccination Appears To Offer Sure Means Of Stamping Out This Disease

Among those who are opposed to vaccination as the most effective preventive measure in preventing smallpox and in quelling the disease, it is customary to criticize the habit of health officers of referring to the terrific outbreaks which this scourge used to make on the population of every nation in years gone by and in past centuries. It is the practice to request modern data.

In this connection, it must be pointed out that a knowledge of the terror which smallpox aroused in the minds of medieval peoples and even in comparatively modern times, is absolutely essential for any clear understanding of what this disease is and how effective medical means of keeping it under control really are.

It is for this reason and this reason only that the health officer delves into history. It is not necessary to go back three years nor to go outside the borders of the Province of Ontario to secure convincing proofs of the value of vaccination as a preventive measure.

In the latter part of February, 1923, the Dufferin County, including Windsor, were struck by an epidemic which, at first, showed signs of rapid development.

The highly contagious nature of the disease and the danger which a whole community runs if the presence of a single case is overlooked was amply demonstrated here by the swiftness and stealth with which the disease made its appearance. It was almost impossible, after most strenuous efforts, for health officers to trace it to its original starting place.

There were two types of smallpox; one, a mild type and the other, a severe and virulent one. The first type was a fortunate one, which was never known to have been in contact with any case of smallpox. Search of the houses where this man had delivered furniture shortly before he took sick, failed to reveal the source of the infection.

It is possible, therefore, that some casual contact, so unimportant that he could not remember it, on the part of one man who had never bothered with vaccination, was responsible for all the deaths which followed.

This merely goes to show that one unvaccinated person can be a menace to himself.

The only other period of interest, which might show where the trouble commenced lies in the fact that just before the Windsor outbreak, there had been a severe epidemic at Chappell, Ontario, and there may have been some connection between the two.

There were, all in all, 63 cases reported and, among these, 32 deaths. But no person who had been vaccinated at any time in his life, even half a century earlier when the methods of administering vaccine were not developed to the high point of efficiency they have reached today, was at any time seriously or dangerously ill.

No person, who had at any time, been vaccinated, died from the disease. Not one of the fatal cases had been protected by vaccination.

The most severe or haemorrhagic cases were all among unvaccinated individuals and every one of these died. They comprised 60 per cent. of the total deaths.

The furniture-mover who was the first to contract the disease eventually recovered, though his case was a very severe one. His wife and his sister, neither of whom had ever been vaccinated, both took the disease and both died. His little daughter, aged 11, had been vaccinated by the school authorities five years before. Although exposed to the disease almost as completely as the other two, she was completely protected and never contracted it.

In another home, a man, aged 75, and his wife, aged 70, both took smallpox. The man had been vaccinated 60 years before. His case was very mild. He did not have fifty pocks all told and soon recovered. His wife had never been vaccinated. She died.

If you consult a physician, he will tell you that one successful vaccination will give you entire protection from fire to seven years. Yet, in Windsor, there were several cases of people vaccinated forty to sixty years before and never since, to whom this safety measure in their childhood meant the difference between slight sickness and death.

In another family, a man and his wife lived with the wife's father, 80 years old. Neither the man nor his wife had been vaccinated. Both died of smallpox. The old man had been vaccinated 62 years before. He had a

mild attack and was around again in three days.

The twin brother of the furniture-mover, who had never been vaccinated, died. His wife had never been vaccinated. She, too, died. All his children, however, had been vaccinated at school within ten years. None of them were ill. All were immune.

The most outstanding single fact connected with this border outbreak, however, is the report of the action taken by Dr. Fred Adams, Windsor's health officer and the other health officers in nearby municipalities.

They prepared to vaccinate almost the entire population. Within a ten day period approximately ninety per cent. of the people in these localities had been given vaccine. The severity of the epidemic had created alarm and the health officers had the hearty support of the people as a whole.

The epidemic was stamped out "like turning off a tap."

An official report was made in June, 1924. The first case had been reported in the latter part of February. General vaccination had been carried out immediately thereafter, continuing until the beginning of March.

Between March 9th and early summer, when the report was made, not one single new case of smallpox had been reported.

The facts in connection with the Windsor outbreak are incontrovertible. They have been checked and rechecked by several health departments. To day Windsor has one of the best protected populations in Ontario. There have been no more epidemics.

Will Found In Old-Book

Discovery Leads To Search For Treasure In French Village

The chance purchase of a batch of old books on the part of a bookseller of Metz brought about a treasure hunt in the chateau of a neighboring village which has already excited the interest of all the inhabitants of the vicinity and may have as a result the discovery of long-missing ingots.

They are said to have been buried by a nobleman who was a supporter of Napoleon and was shot at Belfort in 1872. The ingots are estimated to have an approximate value of 40,000,000 francs.

The books were bought a number of months ago and being unable to dispose of them the bookseller decided to go through them, select those of value for individual sale and destroy the rest. He did this, and just as he was about to burn the book in question, which is an old family misal, he noticed that there were two documents between the covers.

He examined these and found that one, which was written on parchment, was the General's will, bequeathing all his worldly goods to the Church, and the other was a diagram showing where he had buried two heavy chests containing gold, family jewels and other objects of value.

The bookseller showed these to friends, who were convinced of their authenticity and offered to furnish money for the excavations, which are now going on.

Has No Use For Watch

Rich Young Man Says Time Means Nothing To Him

I met a man the other day who has never carried a watch in his life, and has no clock in his home, he says. He does not give a darn what time it is, he says, when he wants to. If he has an appointment he tells his valet about it or his secretary, and they inform him as to his appointments. If he wants to know the time, he asks anyone who may have a watch. During his life he has been given many watches, but they are all resting in his drawer and have never been carried. The man in question has plenty of time on his hands, he is fabulously rich, young and never worked in his life.

Can Hear Through Oars

Seamen along Long Island Sound have discovered a novel way to get their bearings when they are in small boats during thick weather. They put an ear in the water, glue their ear to the handle and can hear the submarine bell on the lightsight several miles away.

Farmer (to artist): "You won't get all that fence into the picture. You should have measured it first!" — Nagels Lustige Welt, Berlin.

Idea Sounds Reasonable

Prisoners Should Receive Wages For Up-Keep Of Their Families

Says W. S. Hughes
Should prisoners be paid wages and these wages be utilized for the up-keep of their families at home? This is the view held by W. S. Hughes, Superintendent of Penitentiaries for Canada, as expressed before a gathering of Kiwanians in Toronto. It has long been felt that the real sufferers, in cases where heads of families or supporters of dependents are sent to jail are those left at home. The prisoners are well kept and regularly fed but the poor wife and children are not so fortunate and they undergo, in many cases, untold privations and sufferings through lack of support. This would certainly appear to be a wrong system. There is no particular reason why the innocent should be made to suffer for the crimes of others and yet this is precisely what it means. Were prisoners put to work and paid fair wages and these wages or at least a good part of them, paid over to the families left unsupported, the situation would be entirely different. There is a lot to be said in favor of the view expressed by Mr. Hughes, and the plan is one that could very well be given a trial.

Looking For Information

Woman Asks Why Men Do Not Talk Enough

A "Non-Talker's Wife," correspondent of a Vancouver paper says: "Sir, in your recent Sunday edition a physician endeavors to explain why women talk so much. Won't you please invite some learned man to answer this burning question: 'Why do men not talk enough?'"

"We realize that it may not always be pleasant for a quiet reflective man to listen to his wife's voluble assertions, especially when he yearns to read the sporting page, but it is not equally distasteful to a cheerful list of women to find herself married to a clam."

"Why should a man confide in his neighbor that he would rather Johnny had gone to 'Teel' than to John Oliver High, but his mother decried otherwise, when he knows that in reply to her request for advice on the subject he merely said, 'Do as you please about it.' Nine out of ten women desire only to please their husbands, and often fail miserably for no other reason than that they neglected to take a course in mind-reading before marriage, so that they might know their husband's wishes without the dear man having to go to the trouble of uttering them."

Sails Are Favored

Where sails are plentiful the Eskimos of the Canadian Arctic are not greatly concerned about walrus, white whale, or narwhal. Owing to their great size, however, the latter animals can be made to supply large quantities of meat for winter use, while the skins of the white whale and the narwhal are considered a delicacy and offer form the "pieces de resistance" in Eskimo hospitality.

"I'm a misogynist," the young man declared.
"You don't say," replied the sweet young thing. "I've got a brother who's studying medicine, too."

Four Grizzlies With Five Shots

The story of a man who, attacked four grizzlies, killed all of them with five cartridges, is one of the strangest to come out of northern British Columbia. The above photograph shows Ed. Anderson with his quarry after the shooting.

H. J. Loughran, Land Agent of the C.P.R., got this story straight from Ed., as well as from some trappers and miners in the vicinity of Kluane. Inlet where this remarkable incident occurred. Anderson and George Corbett were locating a trap line in the Kluane Valley, and Anderson returned to the camp alone along the edge of the ridge. It was growing a little dark, Anderson says, when he heard a noise behind him and turned to see four enormous grizzlies bearing towards him as fast as they could go.

Claim World's Best Hotels In London

United States Outdone By Luxury Of New Buildings

"Americans and other people from all parts of the world who have visited England for the first time this year declare that London now possesses the finest hotels in Europe, surpassing even those in America."

So said Mr. Cassal, the manager of the Green Park Hotel.
"The largest hotels in London are even better than those in America, because as they are so much smaller it is possible to give careful and individual attention, which in an hotel of several thousand bedrooms is out of the question."

"Americans particularly, who are used to the most up-to-date furnishings and equipment in their own country, expected the same when they arrived here, and we had to see that they had it."

In one of London's latest hotels the features include:

A large, light, airy bathroom to each bedroom.

Wash basins of real onyx in the dressing-rooms.

An electric clock in every bedroom which can be illuminated by just pressing a button at the side of the bed.

A house 'phone by the beds which automatically rings to the servants' quarters as soon as the receiver is lifted.

Bedspreads which cost £25 each and made of embroidered Italian silk.
Another manager said that American hotels had become more like railway stations.

"I have stayed at every one of the big hotels in New York," he said, "and I soon found that the whole business had become mechanized."

"There was not that personal touch which one gets in England."
"It is why Americans really prefer our hotels and are so enthusiastic about them."

Over £100,000 was spent in furnishings alone in our hotel, and 95 per cent. of the work was carried out in England.

The other two per cent. allows for the embroidered silk, which came from Switzerland.

Oxygenized air, which is charged ten times an hour, is a feature of another new hotel, which has also a special wing for chauffeurs, with a telephone in each bedroom.

The Double Standard

That one code of laws exists for the rich, and another, entirely different, for the poor, was the contention of Emma Goldman in an address at Toronto. "When the same offence is committed by two different men, belonging to two different groups of society, they are treated differently by the public press and the courts," asserted the Socialist leader.

Canada Has Largest Tail Deposits
The tale deposits in the Macdonald district, Ontario, are the only ones of their kind known in Canada and are the largest on the American continent. They yield a fine, white, felted tale and this product is used extensively in the paper, textile, and felt of powder trades, for which only the highest grades of tale are in demand.

Leaves of house plants should be frequently washed with smoke and dust from fires cover the leaves and plants.

Seed Potatoes

The Superiority Of Certified Seed Potatoes Is Easily Shown

It has been clearly shown during recent years that the seed potatoes certified by the inspectors of the Dominion Department of Agriculture are much superior to the general run of common stock. The rules and regulations governing the production and inspection of this certified seed are given in a new pamphlet on Canadian Certified Seed Potatoes, distributed by the Publications Branch, Department of Agriculture, Ottawa. The standards set for certification are high and the results from the use of certified seed have been correspondingly favorable. Whether potatoes are grown for seed purposes or table stock, it is essential that the very best seed be used, since good foundation stock is the basis of good crops and profitable markets. Commercial potato-growers whose stock is badly infested with disease or contains mixed varieties will find it decidedly advantageous to secure certified seed. The use of such seed would double the yields now being obtained on many farms.

A Remarkable Record

England Has Erected More Than a Million Homes Since the Armistice

The interesting information is contained in dispatches from the Old Land, that England has performed the tremendous task of erecting 1,227,757 homes since the day the Armistice was signed. Upon first glance this does not seem to be such a great achievement, but when one considers England's position at the end of the war, with a heavy debt hanging over her shoulders which she has steadily managed to meet year after year, and the great burden of taxation which the government was compelled to levy upon all classes of people, it is a truly remarkable thing that in spite of all this—to which of course has been added the feeling of unrest, leading up to the worst strike the country has ever known, and adding to the difficult problem of pre-war re-establishment in every line of business and social activity—England has been able to face the task of providing over a million homes for her people.

Manners In Three Grades

Two Unaffected By Time and One Subject To Change

Manners are becoming so much a matter of life and death that what a contributor to the London Graphic says about them is quite timely:

The difference between good and bad manners is as deep as the difference between sympathy and curiosity; so deep, indeed, that it would be fairer to grade manners—like eggs—into three classes; viz., Class A, good manners; Class B, doubtful manners; Class C, bad manners. The first and third classes are equally unaffected by time and tide, the class midway being subject to certain fluctuations due to digestion and other dull but purely individual causes.

The truth is that good manners are natural and individual, neither the product of any particular process or period, and just as common now as they ever were."

Some Chinese Sayings

Have Ways Of Their Own To Impart Information

Here are some Chinese examples of how to give bad news a nice sound. If a man's parents die the Chinaman informs his friends by saying "They are not." The death of an official is made public by the announcement "He is drawing no salary." An ordinary individual upon dying is said to have "become an angel." After burial, the corpse is referred to as being in "the city of old age." In the same way common objects are given names. The mushroom is "a fat little umbrella," and oranges are "golden balls." A burglar is known as the "gentleman of the beam," while to give hush-money is "to scatter sleep."

Not Restricted To Numbers

The prosecuting counsel had encountered a rather difficult witness. At length, exasperated by the man's evasive answers, he asked him whether he was acquainted with any of the jury.

"Yes, sir," he replied, "more than half of them."
"Are you willing to swear that you know more than half of them?" demanded the man of law.

"Yes, sir," he replied quickly.
"If it comes to that," he replied, "I'm willing to swear that I know more than all of 'em put together!"

Bill: "How shall I address the most beautiful charming, darling girl in the whole world?"
Phil: "Look in my memo book; I think her name and street number's on the second page."

The Carrier Current System

Canadian National Telegraph First To Introduce System Into Canada

The official opening of the "Carrier current" system by the Canadian National Telegraphs, on Wednesday, November 9th, marks the completion of the second link of the installation from Montreal to Vancouver, of the "carrier" system. The first link, that from Toronto to Montreal, was put into active service on April 26, and the system will be extended to Vancouver as rapidly as possible. When it is completed, Montreal, Toronto, Winnipeg, Saskatoon, and Vancouver will be so arranged that, by operating a few switches, it will be possible to make any or all of these stations terminals, and, therefore, to transmit messages to any or all of them.

The Toronto-to-Winnipeg link of the "carrier current" system is the longest single section of "carrier" now in operation, comprising as it does seven repeater stations. These stations are located at Parry Sound, Carleton Place, Honeyeagle, Jellison, Port Arthur, and Port Frances, and the system provides ten two-way "carrier" telegraph channels, two composite Morse direct current telegraph circuits, and a long-distance telegraph circuit.

The telephone circuit has the distinction of being the pioneer line in thinking Eastern with Western Canada by direct wire. It is not for commercial purposes, but is of extreme importance to the Canadian National Railways, supplying as it does facilities for the transaction of executive railway business. Thus, the telephone circuit will fill a long felt want in providing executive officers with a means of prompt communication with officials of the Western Region, by affording a direct connection between Winnipeg and headquarters at Montreal and the Central Region headquarters at Toronto.

The development of the "carrier" system has only recently, within a period of approximately the last five years, reached a point where it is of value in commercial use, and while the Canadian National Telegraphs is the first to introduce it into Canada, as a commercial medium for the dispatch of telegraphic messages, the system has been in operation in the United States and Europe, and in the province of Alberta where its use was restricted to telephone purposes only. In no case, however, have these previous systems reached the vast mileage which will mark the completion of the "Canadian National Telegraphs" system.

One of the features of the "carrier current" is its virtual immunity from Aurora Doreals or "earth currents" and it therefore insures a continuity of communication which physical lines do not. The "carrier" system is also unencumbered. A recent demonstration of this fact took place on October 12 and 13, when earth current disturbances affected all communicating companies. While the Canadian National "carrier current" system was not completed, it was thrown into temporary service and provided facilities over which the Canadian National Telegraphs was able to operate two automatic multiplex and eight Morse circuits on the one pair of wires. The earth currents, which amounted to 200 milliamperes, completely tied up all physical wires, but the "carrier" system worked throughout with absolute no distortion to the telegraph signals.

The capacity of the system is limited to ten two-way "carrier" telegraph channels, providing full duplex operation between the terminals by Morse or each channel may be equipped with automatic printing multiplex equipment, capable of transmitting eight messages simultaneously, four in each direction. By the use of the multiplex, it is possible to transmit a total of eighty messages simultaneously over the one pair of line wires.

Leaves Fund For Research

Professor Adrian Stokes, the London pathologist who died of yellow fever while serving on a Rockefeller Institute commission in Nigeria in an effort to find a cure for the disease, gave a large part of his fortune as well as his life to the cause of research. By his will, now published, he left \$25,000 to Dr. Geoffrey Guya, Guya's assistant, to carry out research work at Guya's Hospital, a fellow research worker, to aid in carrying on the endeavor.

A Matrimonial Musical Test

Music is the key to successful matrimony, says a Chicago opera singer. "Give your prospective husband a few dollars to spend for phonograph records," he advises brides-to-be. "If he comes back with 'Home Sweet Home,' then go ahead and marry him, but if he spends the money for a lot of 'hot noises,' you'd better give him the hint. And suppose he brings home 'The Alimony Blues'?" — St. Paul Pioneer Press.

LESSON No. 19

Question: Why is emulsified cod-liver oil so wonderful a food-tonic for young girls and women?

Answer: Because it abounds in nourishing factors that are particularly beneficial to people prone to anemia and other conditions due to malnutrition. Keep your system vitamin-nourished—take

SCOTT'S EMULSION

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XII—Continued.

There was a flat stone by the river to which she often took her English book to read. For she loved the sound of the flowing water. It brought her back to the elemental things of life, and told her again the stories she had heard when she was a child—stories of man's long struggle with the wilderness, flood, famine and cold—and in its blithe murmuring Helmi could discern a warning note, it was trying to tell her that winter was coming, pitiless and cold, and that now was the time, when the grass was green and the water running, to build protection from the cold, and lay up stores against that long, white, desolate time. And although the river spoke only of the winter, Helmi knew it had a deeper meaning—and no matter how hard she studied her English book she could not altogether quell the voice of the years.

The velvet leaves of summer which went by her—some cold and fragrant with the wet willow which grow thick around the edge of the saucer; some hot, like a blast from an oven—brought the same story and the same urge, filling her with a discontent and a vague restlessness that was new and disturbing. When she could bear it no longer Helmi always was able to drown the voices by a new orgy of cleaning at the boarding-house. She had never heard of sublimation, but she knew that something mysterious and uncontrollable drove her into activity, and in it she found peace.

Helmi was happiest when she saw, a long day's work ahead of her, nerve and muscle firing—a day's work that would send her to bed so tired and sleepy that the long black night would go by like a flash, bounded on one side the moment her head touched the pillow, and on the other side by the first whirr of the alarm clock. She had done all she could for her own little box of a room up under the rafters. She had braided a mat for the floor, and hung blinds of four sacking, washed white and rolled on a reel crocheted cord. She had also made holders for her clothes out of rolled newspapers.

One day Helmi was on her way

TORTURED FOR SIX MONTHS

Maritime Man Completely Relieved of Kidney Trouble by Gin Pills

When kidneys are inflamed or clogged life becomes a misery, as Mr. W. McArthur of St. John, N.B., realized. Fortunately, he also discovered Gin Pills, and gratefully wrote:

"I suffered for six months with kidney trouble. Doctors said I would have to have an operation before I could go back to my heavy work in the machine shop. I was advised to try Gin Pills by the druggist. After taking three boxes I had no more trouble."

Mr. McArthur is not the first person saved from the surgeon's knife by Gin Pills. For years, Gin Pills have relieved acute kidney conditions.

Never neglect backache, headache, brick dust in urine, swollen joints, dizziness, spots before the eyes, painful, scanty or too frequent urination, Nature's warning of kidney derangement. Play safe. Take Gin Pills. 50c a box at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Ontario.

Cottage Hospital For Women Lepers

Romance Surrounds Gift Of London Postman To Indian Colony
Francis Cardinal, a London postman, who delivers letters in Goswell Road, has sailed for India on special leave to open a cottage hospital which he has built for women lepers.

Mr. Cardinal served in India during the war, and was impressed with the sufferings of the ostracized lepers. After the war he became acquainted with an old woman of nearly eighty, who lived next door, and was also interested in lepers. A bond of sympathy grew up between them, and Mr. Cardinal became a sort of adopted son. A short time ago the old woman died, and left him a small sum of money, which Mr. Cardinal has put with his own savings, making just enough to build a cottage hospital at the Manamandra leper colony, Southern India, at a cost of £125 and pay for his trip to open it.

The sky seemed to split wide open above her head as she ran; the heavens were lashed with knotted cords of flame swirling by invisible giant hands. But Helmi ran on. She must get to this man and bring him in. She thought of Peter Sauri, all blackened and burned beside his plough. She called to him above the storm, and he must have heard for he turned toward her, smiling. Then came a flash that blinded her and turned the world into blackest night. Something fell into her arms.

When Helmi opened her eyes a strange prickly sensation was in her arms and feet. She was sitting on the pile of lumber, holding someone in her arms, someone with face ghastly in the light, and whose eyes were closed. A cry broke from Helmi's lips. "Jack Doran!" she called; "Oh, Jack Doran, is it you?"

She carried him into the house, his weight seeming nothing to her in her excitement. Her own impulse was to get him to shelter before the storm broke. Big drops fell on his face as she hurried along, and instinctively she leaned further over him to shelter him. There was no lounge or bed downstairs, so place where she could lay him. To her own room she brought him and laid him on her bed. He moaned when she laid him down. Then she ran to alarm the house. The rain was coming down now in torrents, tracing in a mad flood down the windows, filling the house with a steady, deafening roar, through which peals of thunder came bursting like cannon.

Mrs. McMann ploughed steadily up the stairs. "He ain't dead," she said, "nor nothing near it, but he's been stunned. You see there ain't a mark on him, but he sure had a nasty wallop. It was lucky for him you saw him fall."

Helmi did not explain. "He'd have been drowned to death like so and if he had been left lying there. Gosh! ain't that one awful rain. We can't send for the doctor just now, that's sure. Anyway, I don't think there's anything to do for Jack but just let him lie. He's breathe! all right, and his color is coming back!"

Helmi watched Jack's pale face anxiously. His cheeks were beginning to show their ghastly pallor, and his lips were reddening. She noted admiringly the curly hair waved back from the high white forehead, the gracefully arched eyebrows, and the skin of the neck so smooth and white. Helmi touched Jack's forehead gently with her hand. There was something strangely familiar about his face as he lay before her.

For two days Jack Doran lay without speaking. Once he opened his eyes and seemed about to awake, but turned over on his side and went into another long sleep. The men came to see him and proffered much advice. "Lots of fresh air," they said, "and keep everything quiet, and just leave him alone." His relief, in a moment, slipped on the floor. The men had suggested carrying Jack to the bunk-house, but she had objected. She didn't mind keeping him, she said, and the bunk-house was noisy.

(To Be Continued.)

Tribute Of Two Nations

Tombs Of Unknown Soldiers Forever Honored In France and England
In Westminster Abbey on the tomb of the British "Unknown Soldier" are the words: "After the shadows, light."

Under the Arc de Triomphe in Paris, sleeps the French "Unknown Soldier." A light is kept burning and on the marble slab are these words: "Here lies a French Soldier, dead for his country. Before then, little soldier of France, everyone kneels, weeping for the son, the father, the brother, the husband, now gone; before such glory grateful France bows down and mourns for her best children, who, in giving their lives, saved their country. Under the Triumphal Arch, rest forever, Unknown Soldier."

Niagara Falls In Danger

Famous Natural Wonder May Ultimately Dwindle To Little More Than A Rapid

One of the wonders of the world is in jeopardy. Niagara Falls is in danger of becoming only a rapid. During the past few years the erosion in the horseshoe has tended to the arch of that line. There is a depth at the brink of about 15 feet, with the result that the two ends of the horseshoe are at some periods practically dry. Geologists who have studied that curve and the extent and tendency of the erosion actually fear that within 50 years the falls will have developed into what will be little more than rapids.

A passenger motor bus accommodating 30 persons, in use between London and Folkestone, England, has a complete dining service.

Language in India may or may not be a guide to race.

Children's Colds Best Treated Externally

That's why modern mothers prefer Vicks—It cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:
(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;
(2) It "draws out" the soreness like an old-fashioned poultice.

Oxford Students Are

Taking Up Aviation

University Now Has More Than 75 Certified Pilots

Oxford undergraduates are taking to aviation and there are more than 75 certified pilots in student body. As a result of their activity in the university the government has assigned four aeroplanes to the Oxford air squadron. Seventy-five more undergraduates are now receiving air training in these machines.

The preliminary ground training is carried on within Oxford, where students have access to five aeroplanes and a full outfit of aeroplanes parts. The students then go to a Royal Air Force station nearby for their flying experience.

To stimulate flying, university authorities are permitting aviation during school time.

It is considered possible here that aeroplanes races between Oxford and Cambridge may some day be acknowledged sports, as popular as boat racing, cricket, rugby and soccer.

Experiment On Fasting

Chicago Man Finds Eating At Night Increases Weight

To reduce, eat most of your food in the morning, to gain weight, eat heavily in the evening. Frederick Hoelzel of the physiological laboratories of the University of Chicago gives that rule. It is a conclusion based on 500 days of experimental fasting, including a period of forty-one days without food. Mr. Hoelzel also says: "Hunger is just an urge to eat, like the impulse to breathe. Real hunger occurs after eating. Hence, the average person is hungry while he's asleep and doesn't know it."

Hunger can be trained to be less urgent by ignoring it and learning to fast. This is a physical stimulus."

Women, Your Manifold Duties Require Strength

St. Catharines, Ont.—During my early married life Dr. Pierce's Favorite Prescription was very helpful to me as a tonic and nerve-aid. I had become ill run-down, my nervous system all upset, I could not sleep, and was weak and miserable. I was advised by my mother to try Dr. Pierce's Favorite Prescription, and it relieved me of the nervousness and made me a well, strong woman. Since then I have always recommended it to weak women.—Mrs. M. F. Slack, 5 Francis St.

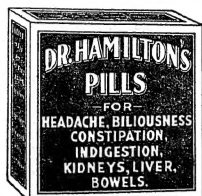

All druggists. Fluid or tablets. Write the Faculty of Dr. Pierce's Invalids Hotel in Buffalo, N. Y., if you feel the need of free advice. Ever tried Dr. Pierce's Pleasant (laxative) Pellets? 50 Pellets for 30c.

Demand For Imitation Furs

The increasing demand for furs with rich reach of the slender purse has brought a boom in the market for dog and cat skins, the National Association of the Fur Industry reports. Even goat skins are used. They are sheared and stencilled into imitation leopard. And gray rats are made into "baby-seal."

Rides Bicycle Across Channel

Another chapter in the history of crossing the channel was added by Rene Savard, a French youth who rode a water bicycle from Calais to Dover. The exact time for crossing the trip is not obtainable. This is said to be the first time that the channel has been crossed by this method.

Honored By France

Memorial For Woman Who Risked Dear Daily During War

At Lille there was unveiled one of the war's most fitting monuments. It was to a woman of Lille, Louisa de Butignies, who as bravely as any soldier on the battlefield laid down her life for her country. During fifteen months from the time of the outbreak of the war she worked behind the German lines, bringing men across the Dutch frontier to serve the allied armies and give military information of the most valuable character.

Death risks were her daily adventures. Once she had to swim a deep canal on a winter's night to avoid a German sentry. Her devices to elude the passport officers were innumerable. In some of her adventures street urinals were her allies. They would slip through sentries and bring back a passport which could be used again, or would divert a sentry's attention at a critical moment when her subterfuges had been discovered.

She was condemned to death, and though the sentence was commuted, she died neglected in a prison in Cologne from pleurisy only two months before the allied victory for which she had worked without flinching.

Proved Himself a Hero

Commander Byrd Holds Honor For Three Life Saving Feats

Commander Richard Byrd, the hero of the most important, from a practical point of view, of the recent Atlantic flights, is a very modest man, but he holds the honor for three life-saving feats. Twelve he has saved men from drowning—once in a sea alive with sharks—and when a Washington theatre roof fell in, burying many people, he wormed his way in beneath a gallery, which threatened to fall at any moment, to extricate a man from under a heavy iron beam. For three hours he worked, although every movement he made increased the danger.

Widow Sues Ex-Kaiser

A French widow, Mme. Prieux, has filed suit for damages against the former Kaiser, charging him with manslaughter. She accuses Wilhelm of responsibility for the sinking of the liner Sussex by a German submarine in the English Channel during the war. Her husband was drowned when the Sussex went down. The Ministry of Justice is studying the suit.

The Oil For the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Want Canadian Graduates

Supply is Not Sufficient For Demand Say Authorities
American college youths may be proving themselves as it has been declared, unfitted for business, but certainly the Canadian graduate is being snapped up by industry as fast as he is produced. Authorities said when asked to answer C. W. Barron, New York editor and writer, who recently said that modern universities were "unfitting college men for practical business." The supply of Canadian college graduates was not sufficient for the demand it was shown in support of the contention that Canadian students were an asset and successful in business.

A Logical Question

Mr. Harry Tate has a particular penchant for the yarn in which he appears as the victim. This is quite one of his best.

"Carry your bag, sir?" asked an eager youngster.

"No, thanks," Tate replied.

"I'll carry it all the way to the station for twopenny."

"I tell you I don't want it carried."

"Don't yer?"

"No, I don't."

"Then," demanded the boy, with perfect logic, "what are you carrying it for?"

New York's Country Store

The last country store within the limits of New York City has been demolished. Thirty-five years ago John Hope opened the store at the corner in Bayville. Up to the time Hope quit business a year ago, the store remained the same. While all around it houses and stores were equipped with modern improvements, Hope's store continued to be heated by a big iron coal stove and to be lighted by kerosene lamps.

It is estimated that the addition of 2 grains to an ear of wheat by Luther Burbank, has added \$5,000,000 to the world's annual wheat crop.

Little Helps For This Week

"If you love Me, keep My commandments,"—John xiv. 15.

Do as thou would'st be done unto; Love God, and love thy neighbor; Watch and pray. These are the words and works of Life; this do.

And live; who doth not this hath lost heaven's way.—Henry Vaughan.

When a man is told that the whole of religion and morality is summed up in the two commandments—to love God and to love our neighbor, he is ready to cry, "Inasmuch as I am, at the first sight of the sea, 'Is this the mighty ocean? Is this all?' Yes, all; but how small a part of it do your eyes survey! Only trust yourself to it, launch out upon it, sail abroad over it, you will find it has no end; it will carry you round the world."

—Julius Hare.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for Little ones—whether it be for the newborn babe or the growing child. Tablets always do good. They are absolutely free from opiates or other harmful drugs and a baby can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R. R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colic and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a bottle. Write for Williams' Medicine Co., Brockville, Ont.

A Carnivorous Cow

A German newspaper tells of a carnivorous cow found near Bremen. Discovering a crate of geese standing before the barn, the cow dropped the hay she was chewing, edged her way to the crate, and had devoured five geese before the farmer noticed what was happening.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. The old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Alberta Forest Area

Forest area in Alberta comprises 25 per cent. of the total land area, according to a resume made by the Canadian Pacific Railway. The land area is given at 253,925 square miles, of which forest comprises 55,650. The total sawtimber stand is given at 11,700,000,000 feet B.M. and hardwood at 5,200,000,000.

Minard's Liniment for Grippes.

Saskatchewan Means "Rapid"
Saskatchewan, the name borne by the great river which rises in the Rockies in Alberta and flows through Saskatchewan and Manitoba into Lake Winnipeg, is an Indian word meaning "rapid" or "swift-flowing."

WAS VERY WEAK NERVOUS AND MELANCHOLY

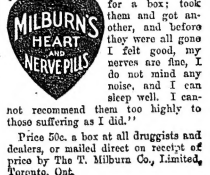

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life."

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well."

"I was advised to try

so I sent at once for a box; took them and got another, and before long I felt good. My nerves are fine, I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50c a box at all druggists and dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Annual Meeting Womens' Institute

The Women's Institute held their annual meeting Wednesday, Dec. 7th, at the home of Mrs. Chapman. The minutes of the last meeting having been read and adopted, correspondence was next dealt with. Letters were read from the secretaries of the District Builders' Associations at Oyen and Youngstown, with regard to the working of the associations at these points. It was decided, on motion of Mrs. Rennie, seconded by Mrs. Lee, to leave consideration of the formation of such a district in Chinook to the discretion of the officers.

Moved by Mrs. Vanhook, seconded by Mrs. Chapman, that the Institute donate \$10 to the School Christmas Tree Fund. Carried.

The following officers were elected: President, Mrs. E. E. Jacques; 1st vice-president, Mrs. Vanhook; and vice-president, Mrs. Lee; Secretary, Mrs. Bassett. Next meeting will be held the first Wednesday in January at the home of Mrs. Vanhook.

Present eight, with two visitors. Collection \$1.98, which included \$1 from Mrs. Thomson towards the Banquet Fund.

Mr. J. Nurcombe of Calgary, homestead inspector, was attending to business in the Chilmark and Langford districts the latter part of last week. His stopping place was at the home of Mr. and Mrs. J. E. Bunney, Langford.

The 1928 Exhibition and Stampede in Calgary will be held during the week of July 9 to 14 and the Edmonton Exhibition in the week of July 16 to 21, it is announced following the annual meeting of the International Association of Fairs and Exhibitions held the past week in Chicago.

John Bellman, a farmer south of Chinook, was taken to Youngstown on Friday by Constable Torpey of the A. P. P., supposedly insane. Mr. Bellman started to walk to town on Thursday afternoon and as his actions had been peculiar for some time, one of his neighbors, who had noticed the actions of Bellman for some time, followed him and advised him to return home. On Friday it was found necessary to bring him to Chinook so that he could be properly taken care of. Constable Torpey was notified and came up from Youngstown to take charge. Mr. Bellman was taken to the insane asylum at Ponoka last Tuesday.

Mr. J. K. Yeats, who has been quite ill, is slightly better this week.

Mr. W. Lee has been seriously ill for the past week with pleurisy. All will be pleased to know he is improving.

Mr. and Mrs. Steckles spent the week end with friends at Youngstown.

HEATHDALE DISTRICT NEWS

Miss Leishman who has been teaching at Peyton school left Friday for her home at Youngstown.

Mrs. Thorsrud and baby daughter who have been visiting at her parents home, Mr. and Mrs. King, at Kimmund, left Monday for their home at Cudworth, Sask. Mr. W. Warron, of Big Stone, returned home on Friday after spending a few days in Calgary.

Heathdale School closed last Thursday for the winter.

Mrs. Sloan who has been teaching at Heathdale school, left with her husband on Friday for Ashmont where they will live on Mr. Sloan's farm.

Mr. and Mrs. W. Anderson left on Friday for California where they will spend the winter with Mr. and Mrs. Hess and relatives. Peyton school closed on Friday.

Annual Meeting

The annual meeting of the Chinook and District Agricultural Society will be held in the School Hall on Saturday, Dec. 10th, at 2 p.m. A good attendance is requested.

Mortgage Sale of Farm Properties

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by The Land Titles Act under 2 certain mortgages which will be produced at the time of the sale, there will be offered for sale by public auction at the Acadia Hotel in the Village of Chinook in the Province of Alberta, on Saturday, the 17th day of December, 1927, at the hour of 2 o'clock in the afternoon, the following properties, namely:

Parcel 1. The North Half of Section 21, in Township 29 and Range 7, West of the 4th Meridian in Alberta;

Parcel 2. The North Half of Section 1, in Township 30 and Range 6, West of the 4th Meridian in Alberta; Reserving out of each parcel unto His Majesty all mines and minerals and the right to work the same.

Terms of sale to be Twenty per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors. Parcel 1 will be offered for sale separately. Immediately thereafter and whether the sale of parcel 1 shall have been successful or not, parcel 2 will be offered for sale separately.

Each parcel will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save a three crop tenancy terminable by notice between 1st December, 1927, and 1st March, 1928, and taxes for the current year.

The vendor is informed that Parcel 1 is situated about 4 1/2 miles from Chinook and Parcel 2 about 12 miles from Chinook on the C.N.R., and that as to:

PARCEL 1. There are situated thereon a dwelling house, 20 ft. by 28 ft., a stable 26 ft. by 24 ft., lean 26 ft. by 16 ft., granary 14 ft. by 32 ft., lean 14 ft. by 16 ft., 2 hen houses, 12 ft. by 32 ft., and 10 ft. by 16 ft., and 2 sheds, all shingle roofed, also 2 1/2 miles of fencing and a well, and that about 260 acres are under cultivation.

PARCEL 2. There are situated thereon a dwelling house 18 ft. by 24 ft., a stable 28 ft. by 38 ft., both shingle roofed, 2 granaries 12 ft. by 12 ft., and 10 ft. by 12 ft., a lean house, also 4 miles of fencing and 2 wells, and that about 215 acres are under cultivation.

For further particulars and conditions of sale, apply to D. E. Bell, Barrister, Chinook, Alberta.

Dated this 3rd day of October, A. D. 1927.

Approved: W. FORBES, Registrar.
